This secularization has long been recognized as a decisive turning point in the history of American education. John Roberts and James Turner identify the forces and explain the events that reformed the college curriculum during this era."

This book constitutes the refereed proceedings of the First International Workshop on Data Integration in the Life Sciences, DILS 2004, held in Leipzig, Germany, in March 2004. The 13 revised full papers and 2 revised short papers presented were carefully reviewed and selected from many submissions. The papers are organized in topical sections on scientific and clinical workflows, ontologies and taxonomies, indexing and clustering, integration tools and systems, and integration techniques.

As reproductive power finds its way into the hands of medical professionals, lobbyists, and policymakers, the geographies of pregnancy are shifting, and the boundaries need to be redrawn, argues Laura R. Woliver. Across a politically charged backdrop of reproductive issues, Woliver exposes strategies that claim to uphold the best interests of children, families, and women but in reality complicate women's struggles to have control over their own bodies. Utilizing feminist standpoint theory and promoting a feminist ethic of care, Woliver looks at the ways modern reproductive politics are shaped by long-standing debates on abortion and adoption, surrogacy arrangements, new reproductive technologies, medical surveillance, and the mapping of the human genome.

Let the Author's Handbook of Styles for Life Science Journals save you time and trouble by providing a one-stop resource for all your manuscript writing requirements. No more plowing through your journal collection or wandering the library stacks to get those elusive journal pages containing instructions to authors. This unique book contains all the information you need to know: whether the journal will consider your manuscript; the journal's submission address; how to construct the abstract, illustrations, tables, and references; and specific information on copyright, multiple authorship, statistical analyses, and page charges. The Author's Handbook of Styles for Life Science Journals gives all this information for 440 of the most important English-language, life science journals. Titles were selected from the "Journal Rankings by Times Cited" list in the Science Citation Index Journal Citation Report. Because this report is heavily weighted toward the medical sciences, other life science journals are incorporated into the book based on general level of prestige and reputation. In addition, some new titles that promise to be important to their fields, like Nature Medicine and Emerging Infectious Diseases are also included. Organized by journal title, the handbook's entries are uniformly arranged to allow direct comparison between journals. Information is presented in an easy-to-use, easy-to-read format with clear and explicitly stated instructions. The Author's Handbook of Styles for Life Science Journals gives authors in the life sciences all the information necessary for the correct and complete compilation of a manuscript for submission to their journal of choice.

This set of essays, which surveys major developments in the winding down of nineteenth-century methods of Shakespeare staging, spans the decades from the 1880s to about 1920. The Epilogue describes the American celebration of the Tercentenary of Shakespeare's death.
