For most citizens, buying a residential property (dwelling) is the most important transaction during their lifetime. Residential properties represent the most significant component of households' expenses and, at the same time, their most valuable assets. The Residential Property Prices Indices (RPPIs) are index numbers measuring the rate at which the prices of residential properties are changing over time.

RPPIs are key statistics not only for citizens and households across the world, but also for economic and monetary policy makers. Among their professional uses, they serve, for example, to monitor macroeconomic imbalances and risk exposure of the financial sector. This Handbook provides, for the first time, comprehensive guidelines for the compilation of RPPIs and explains in depth the methods and best practices used to calculate an RPPi. It also examines the underlying economic and statistical concepts and defines the principles guiding the methodological and practical choices for the compilation of the indices. The Handbook primarily addresses official statisticians in charge of producing residential property price indices; at the same time, it addresses the overall requirement on RPPIs by providing a harmonised methodological and practical framework to all parties interested in the compilation of such indices. The RPPIs Handbook has been written by leading academics in index number theory and by recognised experts in RPPIs compilation. Its development has been coordinated by Eurostat, the statistical office of the European Union, with the collaboration of the International Labour Organization (ILO), International Monetary Fund (IMF), Organisation for Economic Co-operation and Development (OECD), United Nations Economic Commission for Europe (UNECE) and the World Bank.

Includes no. 53a: British wartime books for young people.

The production of this manual is a joint activity between the Climate, Energy and Tenure Division (NRC) and the Technologies and practices for smallholder farmers (TECA) Team from the Research and Extension Division (DDNR) of FAO Headquarters in Rome, Italy. The realization of this manual has been possible thanks to the hard review, compilation and edition work of Nadia Scialabba, Natural Resources officer (NRC) and Ilka Gomez and Lisa Thivant, members of the TECA Team. Special thanks are due to the International Federation of Organic Agriculture Movements (IFOAM), the Research Institute of Organic Agriculture (FiBL) and the International Institute for Rural Reconstruction (IIRR) for their valuable documents and publications on organic farming for smallholder farmers.

These best practice guidelines are intended to serve as a target for the quality management of biological resource center collections. They are the result of discussions held by OECD member countries together with a number of key partner countries ...

In recent years, revelations of grand corruption and the plunder of state assets have led to greater scrutiny of financial relationships with politically exposed persons (PEPs) senior government officials and their family members and close associates. Notwithstanding the efforts by many financial institutions and regulatory authorities to prevent corrupt PEPs from entering and using the financial system to launder the proceeds of corruption, there has been an overall failure in the effective implementation of international standards on PEPs. Implementation of an effective PEP regime is a critical component in the prevention and detection of transfers of proceeds of crime and, therefore, ultimately in the process of recovering them. 'Politically Exposed Persons: Preventive Measures for the Banking Sector' is designed to help banks and regulatory authorities address the risks posed by PEPs and prevent corrupt PEPs from using domestic and international financial systems to launder the proceeds of corruption. The book provides recommendations and good practices aimed at improving compliance with international standards and increasing supervisory effectiveness. It is an important tool for individuals, governments, financial and private sector companies, and international organizations involved in developing and implementing standards aimed at fighting corruption and money laundering, and trying to recover stolen assets and the proceeds of corruption.
