Why do we keep
talking about so
many environmental
problems and rarely
solve any? If these
are scientific

Environmental

issues, then why

can't scientists

solve them or at

least agree on what

to do? In his new

book, *The Moon in*

the Nautilus Shell,

ecologist Daniel

Botkin explains

why. For one thing,

although we live in

a world of

constantly changing

environments and

Botkin Keller

talk a lot about
climate change,
most of our
environmental laws,
policies, and
scientific premises
are based on the
idea that the
environment is
constant, never
changing, except
when people affect
it. For another, we
have lost contact

Disconnected from

our surroundings,

we lack the deep
