This textbook aims to explain the principles in international trade theory and show how some useful trade

File Type PDF

Chapter 5

models work. The

book

concentrates on

two fundamental

issues in

international

trade, that is,

the

'determinants of

trade patterns'

and the 'welfare

gains from

trade' in

various economic

File Type PDF

Chapter 5

environments.

Chapters 1 through 3 assume perfect competition and explore the workings of the Ricardian model, the Heckscher-Ohlin-Samuelson model, the Specific Factors model and more recent

File Type PDF

Chapter 5

development of the Eaton-Kortum model. Chapter 4 examines various welfare criteria and their relation to the 'social utility function' and, then, proves the basic gains-from-trade proposition.

Chapters 5 and 6

File Type PDF

Chapter 5

International
Trade

examine the implications of imperfect competition using a unified oligopolistic model and variations of the monopolistically competitive model. The roles of the strategic interaction

File Type PDF

Chapter 5

among firms, the economies of scale, product differentiation, the heterogeneity of firms, and the geographic distribution of agents will be highlighted.

Chapter 7 deals with some trade policy issues

File Type PDF

Chapter 5

International

Trade
such as the effects of tariffs, the relation of tariffs to other policy measures, and the so-called strategic trade policies.

"In all countries, there are laws and regulations

private economic
activity. They
are necessary to
enable private
economic
activity to
thrive, as well
as to provide
for honesty in

consumer

much more. Laws

and regulations,
such as safety
standards,

quality grades,
and health and
food

(phytosanitary)
standards

generally apply
to much economic
activity within
a country. In
very primitive
societies when

File Type PDF

Chapter 5

farming or
hunting was
almost all
economic
activity, such
measures were
much less
necessary. But
as exchanges and
trading
increased, the
need to find
ways to support
transactions

File Type PDF

Chapter 5

International
Trade
became essential
in order to
enable parties
to agree on even
such things as
simple weights
and measures.

Until there was
a commercial
code (legal
framework), most
businesses were
owned primarily
by family

members who
could trust each
other. The
commercial codes
covered such
phenomena as
penalties
against breach
of contract,
standards and
assurances as to

This study
begins with a
brief survey of
economic thought
on the
relationship
between foreign
trade and
national power,

File Type PDF

Chapter 5

from the
Mercantilists
Trade
on. Chapter II
attempts a
systematic
theoretical
approach to the
subject. It
first makes
clear the
fundamental
basis of the
possible use of
foreign trade as

File Type PDF

Chapter 5

an instrument of national power policy. Using well-known concepts of economic analysis, it proceeds to show under what conditions and by means of what policies this instrument is likely to attain

File Type PDF

Chapter 5

International Trade
its highest efficiency. The principles of power policy thus deduced theoretically are then compared with the actual practices followed by German trading methods in recent years.

File Type PDF

Chapter 5

Toward the end of this chapter the reader will be carried into a detailed discussion of certain problems of the theory of international trade, which are touched upon earlier in the chapter. Chapter III is applied

File Type PDF

Chapter 5

to the international

historical

background of

our problem. It

gives a survey

of the

literature on

"economic

aggression"

before and

during World War

I and brings out

the importance

of the Paris

File Type PDF

Chapter 5

safeguards or remedies which could be or have been proposed to prevent the use of foreign trade as an instrument of national power policies. Certain questions raised in Part 1 can be answered in quantitative

File Type PDF

Chapter 5

terms. Part 2

consists, therefore, of an exposition of various trends of international trade in recent years disclosed by statistical analysis. In Chapter V we calculate an index number expressing the

File Type PDF

extent to which the trade of the large trading nations is or has been directed by preference toward the smaller trading countries.

Chapter VI gives index numbers for the degree of concentration

File Type PDF

of their foreign trade on one or a few big markets or sources of supply. Finally, in Chapter VII we measure the extent to which world trade has been based primarily on an exchange of manufactures
