# Confrontational Ceramics

confusion, tension, trauma, and possibly social change that may emerge in situations of contact when people and things interact. A social encounter is, however, not only about negotiation or contemplating existence, but is rather about what happens when people interact actively, when they involve themselves

with people and materialities, when they move around, fetch things, use things, leave things etc. The repeated social encounter is often a confrontation with something, such as an opinion, a performance, or with materialities and the effects are often unpredictable. Encounters may reproduce a social pattern, but also
