This comprehensive, peer-reviewed resource sets the standard for nephrology nursing clinical practice. Written by experts in the field, the 2020 edition presents the newest information regarding kidney disease, its treatment, and the nursing care involved. New and updated content reflects current policy and terminology, including health information technology, collaboration with ESRD Networks, economics of ESRD reimbursement, nutritional needs of patients undergoing bariatric surgery, nutritional needs of pregnant patients, advance care planning, palliative care, and end-of-life care. The seventh edition contains almost 1,800 pages divided into two volumes, includes self-assessment questions, and provides more than 60 nursing continuing professional development contact hours and almost 12 pharmacology hours.

The mission of the American Society of Diagnostic and Interventional Nephrology (ASDIN) is to promote the proper application of new and existing procedures to improve the care of patients with kidney disease. The Society promotes education, research, public policy and clinical practice initiatives relating to diagnostic and interventional procedures. In an educational program a complete and up-to-date Curriculum is essential. The Residents, Fellows and Practicing Nephrologists rely on their mentors to train them in procedures necessary to provide successful dialysis access. However, since there are several ways to accomplish any goal, the trainees also need a Curriculum which summarizes literature to provide evidence regarding advantages and disadvantages of each technique. This Core Curriculum provides this summary for peritoneal dialysis catheter procedures, which are the sine qua non of a successful dialysis program. The Curriculum represents a collaborative effort from Interventional Nephrologists in a wide variety of practices, from Universities to Private Hospitals to Access Centers. Each author is a recognized expert in the particular procedure or technique that they present. In the Introduction, Dr. Salman and Dr. Asif describe how a successful peritoneal access program directly leads to a larger PD program. Drs. Ash and Agarwal summarize various catheter designs and data indicating relative success of each. They also provide an overview of placement techniques (surgical, laparoscopic, peritoneoscopic, fluoroscopic). They define criteria for normal function and malfunction of PD catheters. Dr. Henry describes the surgical (dissective) technique of catheter placement, which entails dissection of the layers of the anterior abdominal wall. Dr. Zibari provides a detailed description of the laparoscopic technique while Dr. Abreo and colleagues describe the fluoroscopic/dilator/splitsheath approach to PD catheter placement. Dr. Mishler describes the single-puncture peritoneoscopic procedure. Dr. Salman and Dr. Asif focus on complications associated with catheter insertion and describe the PD catheter removal technique. Finally, Dr. Schon and Dr. Wang provide define the proper CPT codes to be used for all PD catheter procedures. This Curriculum should be invaluable to all healthcare professionals performing peritoneal dialysis catheter procedures.

The revised, updated Fourth Edition of this popular handbook provides practical, accessible information on all aspects of dialysis, with emphasis on day-to-day management of patients. Chapters provide complete coverage of hemodialysis, peritoneal dialysis, special problems in dialysis patients, and problems pertaining to various organ systems. This edition reflects the latest guidelines of the National Kidney Foundation's Kidney Disease Outcomes Quality Initiative (KDOQI) on hemodialysis and peritoneal dialysis adequacy and on nutrition. New chapters cover chronic kidney disease management in predialysis patients, frequent daily or nocturnal hemodialysis, and hemodiafiltration. Chapters on venous and arteriovenous access have been completely revised. Each chapter provides references to relevant Web sites.

Module 6 was designed and written for Advance Practice Registered Nurses (APRNs) under the guidance of the module's editors, Katherine Houle and Kim Alleman. Its topics are meant for the APRN new to nephrology practice as well as for those with experience. The module is divided into 5 chapters. The first addresses professional issues related to the APRN and end-of-life issues. In the next chapter, chronic kidney disease stages 1 through 5 are presented. Chapter 3 offers an overview of treatment options for kidney replacement therapy. It includes transplant, hemodialysis, the vascular access, peritoneal dialysis, and home dialysis. The next chapter turns to acute kidney injury (AKI) and presents useful information pertaining to AKI, its causes and treatments. Chapter 5 discusses care of the pediatric patient by the APRN.Additional information on almost all of these topics can be found in the other modules of the Core Curriculum for Nephrology Nursing. The APRN will find this information useful as well.
