This book is a retrospective of the decentralization reform process in Sierra Leone from 2003-07. During this period, the Government of Sierra Leone (GoSL) reestablished elected district and urban councils across the country, transferred certain responsibilities for primary services and local investment and some financial resources to the new councils, and invested heavily in building the administrative infrastructure and capacity of the local councils.

New Decentralization Policy To Promote Local Economic Development. Executive Secretary of the Inter-Ministerial Coordinating Committee on Decentralisation (IMCC) Mahama Salifu, has stated that government is committed to deepening local democracy, improving internally generated revenue of assemblies and promoting local economic development. According to him, government ' s commitment, is shown in the new National Decentralisation Policy and Strategy (NDPS 2020-2024) formulated by government ...

The question of whether political, fiscal, and administrative decentralization improves government effectiveness is hotly debated among researchers and policy makers. 'Decentralization, Democracy, and Development' contributes to the empirical literature on decentralization and the debate on whether it is a viable and desirable state-building strategy for post-conflict countries. This book is a collection of eight papers written by nine authors who were intimately involved in the complex decentralization reform process in Sierra Leone from 2003-07. During this period, Sierra Leone's government established elected district and urban councils across the country, transferred certain responsibilities for primary services and local investment and some financial resources to the new councils, and invested heavily in building the administrative infrastructure and capacity of the local councils. Compared to most other Sub-Saharan African countries that have embarked upon decentralization, Sierra Leone's progress in building local government capacity and restructuring the fiscal system is enviable. The authors conclude that improved security and public services are possible in a decentralizing country and Sierra Leone's progress would not have been possible without significant effort at fiscal decentralization and intensive investment in local government capacity building. The most critical ingredient for this promising but fragile reform process is the dynamic leadership team in charge of promoting the new institutional framework and their persistent effort to achieve quick improvement in the local government system and public services.

The authors of this volume sift through the accumulating evidence to assess how well decentralization has fared. Focusing on consequences rather than causes, their goal is to inform future interventions in support of decentralized governance by showcasing some of the important trade-offs that it has generated so far.

In this definitive history, a key figure in the People's Campaign in Kerala provides a unique insider's account of one of the world's most extensive and successful experiments in decentralization. Launched in 1996, the campaign mobilized over 3 million of Kerala's 30 million people and resulted in bottom-up development planning in all 1,052 of its villages and urban neighborhoods. The authors tell a powerful story of mass mobilization and innovation as bureaucratic opposition was overcome, corruption and cynicism were rooted out, and parliamentary democracy prevailed. Considering both the theoretical and applied significance of the campaign in the context both of India's development since independence and of recent international debates about decentralization, civil society, and empowerment, the book provides invaluable lessons for sustainable development worldwide.

This book explores the value of funding local initiatives that are designed to support development activities and promote local democracy. Reviewing experiences from Africa, Asia, Europe and Latin America, it demonstrates how local funds can deliver development within the context of a rights-based approach and democratic decentralization.

Indonesia over the past two decades has embarked on a process of decentralization as part of a broader process of democratization, which followed earlier periods of centralized governance and authoritarian rule across the archipelago. The purpose of this book is to begin to explore the connections between governance and sustainable society in a wide variety of policy fields in Indonesia, and how reforming governance structures may contribute to societal benefits and the creation of a long-term sustainable society. This book bridges important theoretical debates related to governance and sustainable society and provides empirical research from Indonesia in important policy areas related to this debate. By placing research in different policy areas in a single volume, the link to the broader concepts of governance, decentralization, and societal outcomes is strengthened. The book builds on the recent interest that has focused on Indonesia and the continued development of democracy in the country. The chapters in the book show a rich variety of decentralized governance arrangements and capacity building at the local level in particular. Central standards (for example for social sustainability, anti-corruption arrangements, or for dealing with direct foreign investment), combined with local innovation (for example for municipal coordination of primary health care or metropolitan transport), are key to Indonesia as a country in a continuing process of transformation. We identify three key trends in the on-going process of decentralization and governance in Indonesia. First, we find that formal governance, the relation between the national and local government, is characterized by a system of ' variable geometry multi-level governance ' depending on the policy area. The challenge ahead is strengthening accountability mechanisms to assure national standards while preserving and encouraging local innovation. Secondly, informal governance mechanisms are evolving to move from ' hierarchical to network ' forms of governance. Here the challenge is to insure democratic input by citizens and civil society organizations. Finally, we identify a trend toward

' shared value creation and sustainable cooperation. ' Indonesia is beginning to move from a rather singular policy focus on economic growth to a more complex and developing notion of policymaking for inclusive growth and the creation of a sustainable society for present and future generations. Here the challenge is sound implementation and to increase the effectiveness of governance mechanisms. There is also a noted diffusion of goals, to focus beyond the Jakarta metropolitan area to smaller regional cities, as urbanization continues and rural areas are changing. This book will be of interest for use in advanced undergraduate and graduate courses related to Southeast Asia in the fields of international relations, political science, public administration, economics, law, sociology, education, public health, and the spatial sciences. It will also be of interest to policymakers and government officials at the national and local level in Southeast Asia and middle-income developing countries, officials and policymakers in institutions of regional governance such as the Association of Southeast Asian Nations (ASEAN), and of global governance such as the United Nations and World Bank. It will also be of interest to civil society organizations and other actors focused on policy development and economic development, health, education, the environment, sustainable transport, etc. The book will also be of interest to business people interested in economic and governance issues, such as the management and governance of in-bound foreign investment, inclusive growth, and corporate governance. Finally, the book should be of interest to citizens in advanced, middle-income, and developing countries motivated to learn more about the links between governance and the creation of a sustainable society for current and future generations.
