Aquest llibre posa a l'abast de l'estudiant les quatre disciplines fonamentals que solen incloure's en la geografia física. El tractament privilegiat de la geomorfologia -exigit per la pròpia tradició acadèmica- no exclou un desenvolupament consciencios de la climatologia, la hidrologia i la biogeografia, dins un context d'interconnexions on la geografia és considerada com "ecologia humana".
