This Digital Therapy Machine promises to transfer the benefits of Far Eastern treatment techniques through a handheld gizmo that looks a bit like a TV remote control. The thing offers Acupuncture, Massage, Cupping and Scrapping (?) modes, as well as lots of other tingly stuff which is probably delivered through those innocent looking electrode pads.

technological basis of radiation therapy. Compared with the previous edition, all chapters have been rewritten and updated. In addition, new chapters have been included on various topics, including the use of imaging in treatment planning, second malignant neoplasms due to irradiation, and quality assurance in radiation oncology. The book is divided into two sections. The first covers basic concepts in treatment planning, including essential physics, and explains the various approaches to radiation therapy, such as intensity-modulated radiation therapy, tomotherapy, and high and low dose rate brachytherapy. The second part documents the practical clinical applications of these concepts in the treatment of different cancers. All of the chapters have been written by
