When faced with the possibility of a disaster ever happening in their life, most people respond with something along the lines of, "It won't ever happen to me" or "it can't ever happen to me." But the truth is you or anyone else cannot foretell the future. You can't honestly say that there will never be a food shortage or a cash shortage in the future. To prepare for such a scenario, you always have a choice to make: you can either prepare and be frugal now, or you can do nothing and have frugality forced upon you and your family. Frugal living is easily one of the best disaster preparations a true survivalist can make. For one thing, it enables you to spend additional resources towards your survival plan, but it also greatly lessens the surprise or the shock when a disaster scenario comes our way. A financial collapse or recession is just one of the many disasters that can and will be forced upon us. We already had one major recession back in 2008, but a future economic collapse will be far worse than that. Economic collapses and recessions are both noted for their high unemployment levels, bankruptcies of major businesses and companies, a significant lowering of consumer spending, and even hyperinflation which can lead to a multitude of other problems such as civil unrest. Can you honestly say you are prepared for an economic collapse? If not, then this book will be perfect for you. In this book, we are going to discuss how to begin preparing financially for a major disaster such as an economic collapse from a beginner's perspective. The specific subjects that we are going to cover include each of the following: \* Why A Complete Financial Collapse Is Coming \* The Benefits Of Preparing Financially Now \* Setting A Budget and Getting Out Of Debt \* Easy Ways To Make More Money \* Living Frugally \* Making A Survival Emergency Fund When people think about preparing for disaster, they often think about hoarding food and water and other necessities, putting together a bug out bag, finding a suitable bug out location, and so on. That's all great, but at the same time, you have to adequately prepare your finances for disaster as well. It's one of the most overlooked aspects of prepping, but at the same time, it's also one of the most critical.
