The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas – climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

The United States Code, 2006 Edition, contains the General and Permanent Laws of the United States Enacted Through the 109th Congress (Ending January 3, 2007, the Last Law of Which was Signed on January 15, 2007).

Lists treaties and other international agreements of the United States on record in the Department of State on January 1, 2011 which had not expired by their terms or which had not been denounced by the parties, replaced or superseded by other agreements, or otherwise definitely terminated. "Can Orentlicher be serious in calling for a plural executive? The answer is yes, and he presents thoughtful and challenging arguments responding to likely criticisms. Any readers who are other than completely complacent about the current state of American politics will have to admire Orentlicher's distinctive audacity and to respond themselves to his well-argued points." –Sanford Levinson, author of Framed: America's 51 Constitutions and the Crisis of Governance "In this refreshingly provocative book, David Orentlicher explains why it is due time for us to reconsider dominant ideas about the presidency, now arguably our most powerful political institution." –William E. Scheuerman, Indiana University When talking heads and political pundits make their "What's Wrong with America" lists, two concerns invariably rise to the top: the growing presidential abuse of power and the toxic political atmosphere in Washington. In Two Presidents Are Better Than One, David Orentlicher shows how the "imperial presidency" and partisan conflict are largely the result of a deeper problem—the Constitution's placement of a single president atop the executive branch. Accordingly, writes Orentlicher, we can fix our broken political system by replacing the one person, one-party presidency with a two-person, two-party executive branch. Orentlicher contends that our founding fathers did not anticipate the extent to which their checks and balances would fail to contain executive power and partisan discord. As the stakes in presidential elections have grown ever higher since the New Deal, battles to capture the White House have greatly exacerbated partisan differences. Had the framers been able to predict the future, Orentlicher argues, they would have been far less enamored with the idea of a single leader at the head of the executive branch and far more receptive to the alternative proposals for a plural executive that they rejected. Analyzing the histories of other countries with a plural executive branch and past examples of bipartisan cooperation within Congress, Orentlicher shows us why and how to implement a two-person, two-party presidency. Ultimately, Two Presidents Are Better Than One demonstrates why we need constitutional reform to rebalance power between the executive and legislative branches and contain partisan conflict in Washington. David Orentlicher is Samuel R. Rosen Professor at Indiana University Robert H. McKinney School of Law. A scholar of constitutional law and a former state representative, David also has taught at Princeton University and the University of Chicago Law School. He earned degrees in law and medicine at Harvard and specializes as well in health care law and ethics.
