In these compelling
new essays, leading

critics sharpen our understanding of the narrative structures that convey meaning in fiction, taking as their point of departure the narratological positions of Dorrit Cohn, Gerard Genette, and Franz Stanzel.

This collection demonstrates how narratology, with its

Download Free Edwin

attention to the modalities of presenting consciousness, offers a point of entry for scholars investigating the socio-cultural dimensions of literary representations.

Drawing from a wide range of literary texts, the essays explore the borderline between fiction and

Download Free Edwin

history; explain how characters are constructed by both author and reader through the narration of consciousness; show how gender shapes narrative strategies ranging from the depiction of consciousness through intertextuality to the representation of the body; address

issues of contingency
in narrative; and
present a debate on
the crucial function of
person in the literary
text. The contributors
