Make informed decisions in today's dynamic international businessenvironments International accounting has never been so exciting. Not only is the pace of international business, finance, and investment rapidlyincreasing, but we are also moving closer than ever before toward convergence of accounting standards worldwide. Updated and revised to keep pace with these changes, this SixthEdition of Radebaugh, Gray, and Black's International Accountingand Multinational Enterprises focuses on international businessstrategies and how accounting applies to these strategies. You'lllearn how to use financial and accounting information acrossborders, and make more informed decisions in an increasinglycomplex international business environment. The authors alsoexplain the key factors, including cultural differences, thatinfluence accounting standards and practices in differentcountries, and how those factors impact the harmonization ofstandards worldwide. New to This Edition: * New coauthor, Ervin L. Black of Brigham Young University. * Updated coverage on corporate governance, Sarbanes-Oxley, thePublic Company Accounting Oversight Board (PCAOB), and how theseforces affect U.S.-based multinationals, as well as companies inother countries. * Increased coverage of the efforts of the International AccountingStandards Board (IASB) to establish a uniform set of InternationalFinancial Reporting Standards (IRFS) worldwide and its interfacewith different national standard setters, especially the FASB. Special attention is given to the experience of the European Unionand Australia in adopting IFRS in 2005. * A web-based International Accounting Practice Problem, whichhelps students see how to apply IFRS to a set oftransactions. * Brief, user-oriented examples called Strategic Decision Points atthe beginning of each chapter. * Expanded end-of-chapter material, including more discussionquestions and exercises. * New cases (two per chapter) on the web. * Accounting for foreign exchange is now covered in two chapters. We have spent a great deal of time on the continued development of accounting and auditing standards, which are used as a primary component of corporate reporting, to reach today's financial reporting framework. However, is it possible to say that, currently, financial statements provide full and prompt disclosure? Or will they still be useful as a primary element with their current structures in corporate reporting? Undoubtedly, we are deeply concerned about these issues in recent times. This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way. Therefore, this book is organized into six sections: "Achieving Sustainability through Corporate Reporting", "International Standardization", "Financial Reporting Quality", "Accounting Profession and Behavioral Aspects", "Public Sector Accounting and Reporting", and "Managerial Accounting".

Like its previous editions, the Seventh Edition of Accounting Theory presents complex materials in a clear and understandable manner. Incorporating the latest accounting standards and presenting the most up-to-date accounting theory from the top academic journals in accounting and finance throughout the world, this book comprehensively presents both the theoretical structure of accounting theory as well as the politics of the standard-setting process, which often opposes the theoretical structure. Key Features: - A reorganized table of contents with a thoroughly revised chapter on International Accounting (Chapter 10) - Discussion of the conceptual framework of the IASB (Chapter 7) - An emphasis on principles-based standards as opposed to rules-based standards - More theoretical issues are related to real world examples coming from the popular news media. - New questions, cases, problems, and writing assignments--many from corporate annual reports. - An Instructor's Resource CD includes answers to end-of-chapter materials, chapter summaries, test banks, and PowerPoint slides.

Nils Eikelmann describes the framework conditions for the application of value-based performance measures and critically analyses selected ones. The disclosure of value-based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors. However, companies adapt the developed theoretical concepts of value-based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies. In addition, there is a variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is divided into three parts: the analysis of annual reports of selected European companies, the calculation of a standardised value-based performance measure and a value relevance study in the form of an association study. Contents Framework conditions for the application of value based performance measures Critical evaluation of selected value concepts Application and value relevance of value based performance measures in Europe Target Groups Scientists and students in the field of controlling and accounting Practitioners in the same fields About the Author Nils Eikelmann works in the accounting department of a German power supply company. He received his doctorate from the Universidad Católica de Murcia, Spain. As a part-time lecturer he teaches accounting at the FOM Hochschule für Oekonomie & Management Essen, Germany.
