In this courageous book, John L. Jackson, Jr. draws on current events as well as everyday interactions to demonstrate the culture of race-based paranoia and its profound effects on our lives. He explains how it is cultivated and reinforced, and how it complicates the goal of racial equality. In this paperback edition, Jackson explores the 2008 presidential election, weaving in examples ranging from the notorious New Yorker cover to Saturday Night Live's political parodies.

In this ground-breaking book, Stephen C. Ferguson addresses a seminal question that is too-often ignored: What should be the philosophical basis for African American studies? The volume explores philosophical issues and problems in their relationship to Black studies. Ferguson shows that philosophy is not a sterile intellectual pursuit, but a critical tool to gathering knowledge about the Black experience. Cultural idealism in various forms has become enormously influential as a framework for Black studies. Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism. Focusing on the hugely popular Afrocentric school of thought, this book's engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions. In turn, Ferguson argues for the centrality of the Black working class—both men and women—to Black Studies.

After the 2008 election and 2012 reelection of Barack Obama as US president and the 1994 election of Nelson Mandela as the first of several blacks to serve as South Africa's president, many within the two countries have declared race to be irrelevant. For contributors to this volume, the presumed demise of race may be premature. Given continued racial disparities in income, education, and employment, as well as in perceptions of problems and promise within the two countries, much healing remains unfinished. Nevertheless, despite persistently pronounced disparities between black and white realities, it has become more difficult to articulate racial issues. Some deem "race" an increasingly unnecessary identity in these more self-consciously "post-racial" times. The volume engages post-racial ideas in both their limitations and promise. Contributors look specifically at the extent to which a church's contemporary response to race consciousness and post-racial consciousness enables it to give an accurate public account of race.

When these data are available, what should the principles be guiding their dissemination, interpretation, and analysis?"--BOOK JACKET.

Power of One is a compilation of thoughts, inspirations, experiential short works and writings. It is a conscientious attempt to make sense of my life experiences in written words and to make meaning of my human actions and interrelationships with people and natural occurrences. It is philosophical in that it presents current thinking and insight of one individual, the importance of one's own view and one's actions within a universal context. It takes a look at what human beings have in common with one another and their existence on earth. Power of One is something that I would like to share with you. This is my first book and I think you will like it. This book is about you, the individual, who wants to think and have one's own thoughts. It is about communicating one's views, one's convictions. It is about being free to express oneself and to tell one's own story. It is about one woman, one God and one people. In a world where our views are largely shaped by the media or the dominating philosophy of the day, this book is about my inner revelations and personal ideas that have evolved on a daily basis. Power of One is my personal journey to enlightenment. Dulcie An'
