Clinical Scenarios in Surgery: Decision Making and Operative Technique presents 125 cases in all areas of general surgery: GI, breast, hepatobiliary, colorectal, cardiothoracic, endocrine, vascular, trauma, pediatric, critical care, and transplant. Each full-color case begins with a patient presentation and proceeds through differential diagnosis, diagnosis and treatment, surgical procedures, postoperative management, and a case conclusion. Each case includes key technical steps, potential pitfalls, take-home points, and suggested readings. The patient stories in these clinical scenarios provide context to facilitate learning the principles of safe surgical care. This book will be particularly useful for senior surgical residents and recent graduates as they prepare for the American Board of Surgery oral examination.

There is a need for a concise revision guide for the FRCS General Surgery Intercollegiate exam, and this is such a book, serving as a companion for the trainee throughout the course of their six-year training rotation. It reflects the exact framework of the exam syllabus issued by the Joint Committee on Higher Surgical Training (JCHST), and contains the most recently amended guidelines. The question and answer style used is a popular and effective method which lends itself perfectly to studying either alone or as a group, wherein one acts as examiner and the other as candidate. Further, the exam is very clinically orientated, with vivas based on a clinical scenario, using patients and images as method of initiating clinical discussion. This book will act as supplementary reading for any course relating to the FRCS exit examination in general surgery. Both the authors and main contributors have passed the FRCS exam in general surgery and have many years experience in postgraduate medical education.

Emergency Surgery provides both a practical guide and an understanding of the issues that need to be considered in the management of emergency surgery patients. It presents a clear account of the key issues involved in the assessment, investigation, resuscitation and surgical management of patients who present to the on-call emergency team. It considers the full breadth of issues encountered in these patients including anaesthesia, pre-op resuscitation/optimization, and initial post-operative care including preliminary high dependency/critical care, as well as the complications and acute

issues found in acute surgical patients on the ward. It is ideal for surgical trainees as well as trainees from other specialties involved in the care of these complex and challenging patients. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

This series provides surgeons in higher training and those wanting an update with a practical reference source of the most current information on recent developments, the latest management issues and operative procedures in each of the major sub-specialties. the series is thoroughly referenced and supported by evidence-based data. In order to meet the increasing interest in Evidence-Based Medicine the authors have cited wherever available the meta-analysis of randomised controlled trials, systematic literature reviews and observational studies and have identified key references within the text
