THE FUTURE OF POLICING. By ROD MORGAN and TIM NEWBURN (Oxford: Clarendon Press, 1997. 224 pp. 9.99 [pounds sterling] pb) Now that commenting on the growth of police studies has become superfluous, it may be time to initiate a new sub-genre and remark upon the number of books that have appeared in recent years with titles formed from some version of the words 'future' and 'police'.

Tim Newburn's editorial introductions to each section of both volumes are exceptionally judicious and helpful, drawing out the core points of each contribution and its relationship to the others. Policing: Key Readings offers not only a wealth of material for students new to the field, but an opportunity to assess the development and future(s) of policing research. For me, studying the papers ...

Comprehensive and accessible, Tim Newburn's bestselling Criminology provides an introduction to the fundamental themes, concepts, theories, methods and events that underpin the subject and form the basis for all undergraduate degree courses and modules in Criminology and Criminal Justice. This third edition includes: A new chapter on politics, reflecting the ever increasing coverage of political influence and decision making on criminology courses New and updated crime data and analysis of trends, plus new content on recent events such as the Volkswagen scandal, the latest developments on historic child abuse, as well as extended coverage throughout of the English riots A fully revised and updated companion website, including exam, review and multiple choice questions, a live Twitter feed from the author providing links to media and academic coverage of events related to the concepts covered in the book, together with links to a dedicated textbook Facebook page Fully updated to reflect recent developments in the field and extensively illustrated, this authoritative text, written by a leading criminologist and experienced lecturer, is essential reading for all students of Criminology and related fields.

This new edition of the Handbook of Policing updates and expands the highly successful first edition, and now includes a completely new chapter on policing and forensics. It provides a comprehensive, but highly readable overview of policing in the UK, and is an essential reference point, combining the expertise of leading academic experts on policing and policing practitioners themselves.

This book provides the most comprehensive and authoritative book yet published on the subject of criminal investigation, a rapidly developing area within the police and other law enforcement agencies, and an important sub discipline within police studies. The subject is rarely out of the headlines, and there is widespread media interest in criminal investigation. Within the police rapid strides are being made in the direction of professionalizing the criminal investigation process, and it has been a particular focus as a means of improving police performance. A number of important reports have been published in the last few years, highlighting the importance of the criminal investigation process not only to the work of the police but to public confidence in this. Each of these reports has identified shortcomings in the way criminal investigations have been conducted, and has made recommendations for improvement. The Handbook of Criminal Investigation provides a rigorous and critical approach to not only the process of criminal investigation, but also the context in which this takes place, the theory underlying it, and the variety of factors which influence approaches to it. It will be an indispensable source of reference for anybody with an interest in, and needing to know about, criminal investigation. Contributors to the book are drawn from both practitioners in the field and academics.

As crime increasingly crosses national boundaries, and international co-operation takes firmer shape, so the development of ideas and policy on the control of crime has become an increasingly international and transnational affair. These developments call attention not just to the many points of convergence in the languages and practices of crime control but also to their persistent differences. This book is concerned both with the very specific issue of 'policy transfer' within the crime control arena, and with the issues raised by a more broadly conceptualized idea of comparative policy analysis. The contributions in the book examine the different ways in which ostensibly similar vocabularies, policies and practices are taken up and applied in the distinct settings they encounter.

Covers the rapidly developing and increasingly professionalized field of contemporary policing with its new emphasis on skills, standards and knowledge.

This book reports the result of research carried out in a busy London police station on the role and impact of closed-circuit television (CCTV) in the management and surveillance of suspects - the most thorough example of the use of CCTV by the police in the world. It focuses on the use of CCTV in a very different environment to that in which its impact has previously been studied, and draws upon the analysis of CCTV footage, suspects' backgrounds and extensive interviewing of both police officers and suspects. The research is situated in the context of concerns about the human rights implications of the use of CCTV, and challenges criminological and social theory in its conceptualisation of the role of their police, their governance and the use of CCTV. It raises key questions about both the future of policing and the treatment of suspects in custody. A key theme of this book is the need to move away from a narrow focus on the negative, intrusive face of surveillance: as this study demonstrates, CCTV has another 'face' - one that potentially watches and protects. Both 'faces' need to be examined and analysed simultaneously in order to understand the impact and implications of electronic surveillance.

Comprehensive and accessible, Tim Newburn's bestselling Criminology provides an introduction to the fundamental themes, concepts, theories, methods and events that underpin the subject and form the basis for all undergraduate degree courses and modules in Criminology and Criminal Justice. This third edition includes: A new chapter on politics, reflecting the ever increasing coverage of political influence and decision making on criminology courses New and updated crime data and analysis of trends, plus new content on recent events such as the Volkswagen scandal, the latest developments on historic child abuse, as well as extended coverage throughout of the English riots A fully revised and updated companion website, including exam, review and multiple choice questions, a live Twitter feed from the author providing links to media and academic coverage of events related to the concepts covered in the book, together with links to a dedicated textbook Facebook page Fully updated to reflect recent developments in the field and extensively illustrated, this authoritative text, written by a

leading criminologist and experienced lecturer, is essential reading for all students of Criminology and related fields.

"What do we mean by the term "crime"? Who commits crime and why do they do it? And what can we do about it? This [book] considers what we know about crime and criminality, and about historical trends and competing explanations for patterns of crime in the developed world."--Book flap.

Policing is changing rapidly and radically. An increasingly complex array of public, private and municipal bodies - as well as public police forces - are engaged in the provision of regulation and security. Consequently, it is difficult to think of security provision primarily in terms of what the public police do, and so the terminology of 'fragmented' or 'plural' policing systems has become well-established within criminology and police science. 'Plural policing' is now a central issue within criminology and police studies throughout the world, and there is now a large and growing body of research and theory concerned with its extent, nature and governance. To date, however, this work has been dominated by Anglo-American perspectives. This volume takes a detailed comparative look at the development of plural policing, and provides the most up-to-date work of reference for scholars in this field. Edited by two of the world's leading authorities on policing, and including individual contributions from internationally recognised experts in criminology and police studies, this is the first ever volume to focus on 'plural policing' internationally, and to draw together empirical evidence on its developments in a formal comparative framework.

Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence. Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security.
