Computational intelligence paradigms have attracted the growing interest of researchers, scientists, engineers and application engineers in a number of everyday applications. These applications are not limited to any particular field and include engineering, business, banking and consumer electronics. Computational intelligence paradigms include artificial intelligence, artificial neural networks, fuzzy systems and evolutionary computing. Artificial neural networks can mimic the biological information processing mechanism in a very limited sense. Evolutionary computing algorithms are used for optimisation applications, and fuzzy logic provides a basis for representing uncertain and imprecise knowledge. Practical Applications of Computational Intelligence Techniques contains twelve chapters providing actual application of these techniques in the real world. Such examples include, but are not limited to, intelligent household appliances, aerial spray models, industrial applications and medical diagnostics and practice. This book will be useful to researchers, practicing engineers/scientists and students, who are interested in developing practical applications in a computational intelligence environment.

The measurement of price dynamics is by no means new endeavouirin the official statistics but the process of establishing accurate price changes in time still remains challenging in many areas. One such demanding field is the application of appropriate techniques in price index development for providing amendments reflecting quality differences which might occur in the compared commodities. The book presents results of research on the applicability of hedonic methods in adjusting price indices to changes in the goods quality and test the techniques used for hedonic price indices construction using the data sets for various groups of heterogeneous goods, including used automobiles, appartments, household appliances and ICT goods.

Praised by Wired.com and featured by Chicago Tribune, Booklist, Epicurious, Booklist, and Eat This, Not That! Multicookers such as the GoWISE USA and Instant Pot Duo are hugely popular; however, most recipes are unreliable or are designed to work in only one model of multicooker--and most often, they use only the pressure-cook setting. Enter Multicooker Perfection, a collection of foolproof recipes tested and developed to work in any multicooker and conform to your schedule. Make each recipe "fast" using the pressure-cook setting or let dinner cook while you're out by preparing it "slow" on the slow-cook setting. These crowd-pleasing recipes are perfectly suited for cooking at the touch of a button, from soups and stews like Easy Beef and Barley Soup and Chipotle Pork and Hominy Stew; to weeknight-friendly meals like Braised Chicken Breasts with Tomatoes and Capers, Ziti with Sausage Ragu, and Thai Braised Eggplant; to company-worthy dishes like Tamarind Braised Beef Short Ribs and Osso Buco with Sweet and Spicy Peperonata. Plus, you'll find a chapter of unexpected recipes like Boston Brown Bread, Buffalo Chicken Wings, and even a perfectly creamy Cheesecake. Make cooking easier and better with this must-have cookbook for any multicooker owner.
