He set up the first industrial research laboratory in the world and was a world record holder of 1093 patents. Max Planck (1858 – 1947) He introduced the quantum and became the recipient of the Nobel prize for Physics in 1918. Nikola Tesla (1856 – 1943)

Written in simple and lucid language, these biographical sketches of great scientists have been put together for ready reference. History of the world is replete with such instances of such men and women who went against all the odds and achieved great heights and changed the shape of the world. In fact, reading about the life-sketch of a scientist and his achievements, has certainly great infotainment value. Besides, the lives of great men and women provide us inspiration to do things differently, and more confidently. For some people these inspirations have more importance than any other motivational factors. When we learn that Edison was a poor boy without any formal schooling or Faraday was an apprentice at a stationery shop we feel greatly motivated and think, 'if they could do it we can do it too!'. We find a new confidence in ourselves. In this respect the importance of these books, specially for children, can hardly be underestimated. Rather they could even be a part of the curriculum-- as at times they can prove so inspiring and motivate a person in such a way, that they could change the entire course of the life of a person. The main aim of this series is to expand the mental horizons of our readers and motivate them to achieve great heights in life. It is certainly a very valuable addition to the literature of popular science. The book can also prove to be an ideal companion during leisure time.

The book, 71 Famous Scientists is an addition to the exclusive '71 Series', which includes a number of books, such as 71 Science Experiments, 71+10 New Science Projects, 71 + 10 New Science Projects Junior, 71+10 New Science Activities, 71+10 Magic Tricks for Children, etc. published by V&S Publishers and widely appreciated by our esteemed readers. It contains 71 world-renowned Scientists from across the globe, their brief life histories, contributions to the Scientific World including the books, journals and magazines that they have published, Awards and Honours received by them and any significant happenings that have changed the course of our lives. The book includes prominent names like, Albert Einstein, Alessandro Volta, Alexander Fleming, Alexander Graham Bell, Alfred Nobel, Avogadro,

Anders Celsius, Andre Marie Ampere, Antonie van Leeuwenhoek and many such notable personalities. The book has been written especially for the school students of the age group, 10-18 years, but can be read by readers of all ages, who love Science and its amazing and fascinating World of outstanding Inventions and Discoveries that have transformed the human society and our existence! So Dear Readers, grab the book at the earliest for it will educate and interest one and all! #v&spublishers

Students will meet several famous scientists and learn more about their respective scientific discoveries in this leveled text set. Texts are written at four levels to differentiate instruction. Provided comprehension questions complement the texts.

This book presents a group of scientists from different angle consistent with their early lives, education and their basic discoveries of scientific investigation. The book has shown scientists not only as researcher but also as humane too, blessed with humour and humanism like us. It is written in very simple language and interesting way so that every reader can easily achieve scientific literacy.

Brief life sketches of ninety-one world famous scientists.

Creates a history of human scientific achievement as revealed by the lives and individual accomplishments of such scientists as Andreas Vesalius, Nicholaus Copernicus, Johannes Kepler, Charles Darwin, Galileo, and Gregor Mendel.

Profiles great inventors and scientists who have made important contributions to twentieth-century science.

Short biography of world famous scientists.

Nearly forty of the world's most esteemed scientists discuss the big questions that drive their illustrious careers. Co-editor Eduardo Punset—one of Spain's most loved personages for his popularization of the sciences—interviews an impressive collection of characters drawing out the seldom seen personalities of the world's most important men and woman of science. In *Mind, Life and Universe* they describe in their own words the most important and fascinating aspects of their research. Frank and often irreverent, these interviews will keep even the most casual reader of science books rapt for hours. Can brain science explain feelings of happiness and despair? Is it true that chimpanzees are just like us when it comes to sexual innuendo? Is there any hard evidence that life exists anywhere other than on the Earth? Through Punset's skillful questioning, readers will meet one scientist who is passionate about the genetic control of everything and another who spends her every waking hour making sure African ecosystems stay intact. The men and women assembled here by Lynn Margulis and Eduardo Punset will provide a source of endless interest. In captivating conversations with such science luminaries as Jane Goodall, James E. Lovelock, Oliver Sachs, and E. O. Wilson, Punset reveals a hidden world of intellectual interests, verve, and humor. Science enthusiasts and general readers alike will devour *Mind, Life and Universe*, breathless and enchanted by its truths.
