In this paper, we present a review of tax research. We survey four main areas of the literature: (1) the informational role of income tax expense reported for financial accounting, (2) corporate tax avoidance, (3) corporate decision-making including investment, capital structure, and organizational form, and (4) taxes and asset pricing.

~~A review of tax research — ScienceDirect~~

In this paper, we review tax research in accounting as well as tax research in economics and finance to the extent that it is related to or is affected by research in accounting. Shackelford and Shevlin (2001) provide a careful and thorough review of empirical tax research in accounting in the prior Journal of Accounting and Economics review volume. Shackelford and Shevlin limit their review to research published in accounting outlets and describe the development of the relatively young ...

Tax practitioners provide tax advice to clients on a continuing basis and should be familiar with the applicable standards for providing such advice, including Circular 230, the AICPA 's Code of Professional Conduct, and the AICPA 's Statements on Standards for Tax Services (SSTs). CPAs need to keep excellent documentation of all tax research in accordance with these standards.

The goal of this study is to provide a comprehensive and updated review of the theoretical and empirical economic literature on tax and entrepreneurship, taking also into account a number of open, tax-related questions raised by the changing nature of entrepreneurship, symbolised by the growing importance of the collaborative economy.

This book is based upon papers presented at the 10th Annual Conference of the Tax Research Network held at the University of Birmingham, United Kingdom, in September 2000. The book covers four discrete areas namely compliance, e-commerce and taxation, international taxation and taxation within the European Union, and value added tax, and focuses within those areas on issues of topical and continuing interest. In an introductory chapter, the editors provide an overview of the subject matter of each of the substantive chapters (of which there are eleven). They conclude by seeking to extrapolate from those chapters, notwithstanding their diversity, various matters of wider and contemporary import to taxation. The treatment of the material in this book by scholars from various academic disciplines and with differing geographical perspectives also gives distinct and instructive insights into widely recognised and enduring taxation problems within the above-mentioned subject areas. Further, an appreciation and understanding of the multi-faceted approaches which may be adopted for problem solving, and which are evident in this book, can only enhance the prospects of the ultimate resolution of

these problems.

Offering a comprehensive exploration of EU taxation law, this engaging Research Handbook investigates the associated legal principles in the context of both direct and indirect taxation. The important issues and debates arising from these general principles are expertly unpicked, with leading scholars examining the status quo as well as setting out a clear agenda for future research.

Taxation has been seen as the domain of charisma-free accountants, lawyers and number crunchers – an unlikely place to encounter big societal questions about democracy, equity or good governance. Yet it is exactly these issues that pervade conversations about taxation among policymakers, tax collectors, civil society activists, journalists and foreign aid donors in Africa today. Tax has become viewed as central to African development. Written by leading international experts, *Taxing Africa* offers a cutting-edge analysis on all aspects of the continent's tax regime, displaying the crucial role such arrangements have on attempts to create social justice and push economic advancement. From tax evasion by multinational corporations and African elites to how ordinary people navigate complex webs of 'informal' local taxation, the book examines the potential for reform, and how space might be created for enabling locally-led strategies.

This is the second volume of papers published by the global Tax Research Network based on its annual series of conferences. These essays provide valuable insight into the rich diversity of contemporary tax

research. They draw on a variety of perspectives including psychology, law, organizational theory, and public policy. They are written by a mix of scholars from various places around the world and cover a range of themes including equity, taxpayer compliance and rights and tax policy. This volume will provide insights and inspiration to aspiring and experience tax researchers alike.

Based on the findings of a commission chaired by James Mirrlees, this volume presents a coherent picture of tax reform whose aim is to identify the characteristics of a good tax system for any open developed economy, assess the extent to which the UK tax system conforms to these ideals, and recommend how it might be reformed in that direction.

An engaging and enlightening account of taxation told through lively, dramatic, and sometimes ludicrous stories drawn from around the world and across the ages Governments have always struggled to tax in ways that are effective and tolerably fair. Sometimes they fail grotesquely, as when, in 1898, the British ignited a rebellion in Sierra Leone by imposing a tax on huts—and, in repressing it, ended up burning the very huts they intended to tax. Sometimes they succeed astonishingly, as when, in eighteenth-century Britain, a cut in the tax on tea massively increased revenue. In this entertaining book, two leading authorities on taxation, Michael Keen and Joel Slemrod, provide a fascinating and informative tour through these and many other episodes in tax history, both preposterous and dramatic—from the plundering described by Herodotus and an Incan tax payable in lice to the

(misremembered) Boston Tea Party and the scandals of the Panama Papers. Along the way, readers meet a colorful cast of tax rascals, and even a few tax heroes. While it is hard to fathom the inspiration behind such taxes as one on ships that tended to make them sink, Keen and Slemrod show that yesterday 's tax systems have more in common with ours than we may think. Georgian England 's window tax now seems quaint, but was an ingenious way of judging wealth unobtrusively. And Tsar Peter the Great 's tax on beards aimed to induce the nobility to shave, much like today 's carbon taxes aim to slow global warming. *Rebellion, Rascals, and Revenue* is a surprising and one-of-a-kind account of how history illuminates the perennial challenges and timeless principles of taxation—and how the past holds clues to solving the tax problems of today.

'A brief but crucially important book' Marcus Chown In *The Joy of Tax*, tax campaigner Richard Murphy challenges almost every idea you have about tax. For him, tax is fundamentally about the ideas that shape the sort of society we want to live in, not technicalities. His intention is to demonstrate that there is indeed a joy in tax, and by embracing it we can create a fairer society and change the world for the better. Tax has been a feature of human society for a very long time. Almost no one gives tax a good press even though, as Richard Murphy argues, it has been fundamental to the development of democracy the world over. Whilst we may not like tax very much, in contrast it is clear that we really do like the public services which governments provide. So much so, in fact, that for most

of the last 300 years, people have been more than happy for governments to run deficits by spending more than they raise in taxation. 2008 apparently changed all that. The issues of debt, deficits, cuts and austerity have dominated the political agenda ever since. Virtually every aspect of the government's finances and how to rearrange them in the forlorn hope of balancing the books has been discussed in great detail. Despite that, there has been almost no real discussion during this period about what tax is for and how it contributes to the creation of the society we aspire to.
