A Lab of One's Own describes the experiences of some extraordinary but sadly neglected scientific women who tasted independence, responsibility, and excitement in World War One. Understanding the past is crucial for improving the future, and Patricia Fara examines how inherited prejudices continue to limit women's scientific opportunities. Suffragists aligned themselves with scientific and technological progress. Defying arguments about intellectual inferiority and child-bearing responsibilities, during the War they won support by mobilising women to enter conventionally male domains, including science, industry, medicine, and the military. A Lab of One's Own reveals these women's stories, celebrating successes and analysing setbacks. In 1919, the suffragist Millicent Fawcett declared triumphantly that "The war revolutionised the industrial position of women. It found them serfs, and left them free." She was wrong: although women had helped the country to victory and won the vote for those over thirty, they had lost the battle for equality. Men returning from the Front reclaimed their jobs, and conventional hierarchies were re-established - although now the nation knew that women were fully capable of performing work traditionally reserved for men.

A “ beautifully written ” (Kirkus Reviews, starred review) memoir-manifesto from the first female director of the National Science Foundation about the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. If you think sexism thrives only on Wall Street or Hollywood, you haven ' t visited a lab, a science department, a research foundation, or a biotech firm. Rita Colwell is one of the top scientists in America: the groundbreaking microbiologist who discovered how cholera survives between epidemics and the former head of the National Science Foundation. But when she first applied for a graduate fellowship in bacteriology, she was told, “ We don ' t waste fellowships on women. ” A lack of support from some male superiors would lead her to change her area of study six times before completing her PhD. A Lab of One ' s Own is an “ engaging ” (Booklist) book that documents all Colwell has seen and heard over her six decades in science, from sexual harassment in the lab to obscure systems blocking women from leading professional organizations or publishing their work. Along the way, she encounters other women pushing back against the status quo, including a group at MIT who revolt when they discover their labs are a fraction of the size of their male colleagues. Resistance gave female scientists special gifts: forced to change specialties so many times, they came to see things in a more interdisciplinary way, which turned out to be key to making new discoveries in the 20th and 21st centuries. Colwell would also witness the advances that could be made when men and women worked together—often under her direction, such as when she headed a team that helped to uncover the source of anthrax used in the 2001 letter attacks. A Lab of One ' s Own is “ an inspiring read for women embarking on a career or experiencing career challenges ” (Library Journal, starred review) that shares the sheer joy a scientist feels when moving toward a breakthrough, and the thrill of uncovering a whole new generation of female pioneers. It is the science book for the #MeToo era, offering an astute diagnosis of how to fix the problem of sexism in science—and a celebration of women pushing back.

It has quickly become apparent in the past year that online learning is not only an asset, but it is critical to the continued education of youth during times of crisis. However, districts and schools across the nation are in need of guidance and practical, research-backed approaches to distance and hybrid learning. The current COVID-19 crisis has demonstrated that effective learning in K-12 is possible, but many districts struggled and continue to struggle in achieving that reality. There is also the growing consensus that even if things “ return to normal, ” distance and blended learning strategies should continue to be employed in many ways across the K-12 environment. *Designing Effective Distance and Blended Learning Environments in K-12* provides key insights into the ways that school districts and educators from across the world have effectively designed and implemented distance and blended learning approaches to enable and enhance student learning. The diverse collection of authors from various demographics and roles in school systems will benefit readers across a wide spectrum of school community stakeholders. There will also be an emphasis on how research and theory is put into practice, along with an honest discussion of what strategies and actions were successful as well as those that were less so. This book is essential for professionals and researchers working in the field of K-12 education, particularly superintendents, curriculum developers, professional learning designers, school principals, instructional technology specialists, and teachers, as well as administrators, researchers, academicians, and students interested in the effective practices being used in blended learning approaches.

College is easy for missionary kid Kennedy Stern. It's staying alive that's a lot more difficult. Kennedy could thrive in Harvard's pre-med program ... if only there weren't so many people who wanted her dead. Engrossing, thought-provoking, and never preachy, the Kennedy Stern Christian suspense series follows Kennedy as an undergrad who gets kidnapped while volunteering at a crisis pregnancy center, experiences police brutality firsthand, finds herself on a hijacked airplane, and much more. "Alana Terry is one of the few authors that doesn't create a bad book. Her stories are crafted with a lot of insight and tackle issues most authors wouldn't dream of touching." ~ Sheila McIntyre, book reviewer Find out why the Kennedy Stern novels are being called "the most relevant Christian series of the decade." Buy the complete nine-book library today, but be prepared to stay up late.
