For undergraduate courses in Career Planning and Decision-Making. Helping students take charge of their professional future, this action-oriented handbook covers what every college student needs to know about making career choices, searching for suitable internships and jobs, and succeeding in the workplace of the 21st century. Putting numerous activities for self-assessment and research at the heart of the text, it builds upon a sound theoretical framework that focuses on three major areas: 1) searching for information (exploration); 2) setting your career direction (decision-making) and; 3) making your work experience count (success in the workplace).

The landscape of student affairs in American higher education has increasingly become multidimensional due to more diversity of student population and more complex issues students bring to campus. This new fifth edition is designed to equip student affairs professionals to understand and know well not only the philosophy, history, mission of student affairs, and that their practice is theory-based and outcome-oriented but also that their role and function are influenced by the shifts in philosophy, mission and strategies, theories, and nature of American

higher education. With most chapters substantially rewritten, this edition has included three brand new chapters which cover functional areas of fraternity and sorority life, collegiate recreation, and assessment and student learning. These three chapters are very unique in that student affairs mission, values, and organizational structure are clearly presented about these functional areas. In addition to the new chapters, the text has also expanded its content to international students, adult students, veteran students, and students with disabilities. This edition has been integrated with the most recent literature, professional standards, and critical issues in student affairs that have occurred since publication of the previous edition in 2010. The book is designed for both Master's- and Doctoral-level students in need of an overview of student affairs functional areas. It can also be used as a teaching tool by middle- and high-level administrators who supervise interns or staff for professional development. Additionally, the text will also be useful to experienced student affairs administrators who wish to keep abreast of the current trends and issues. In the past 25 years, four editions of this book were published and each edition has been a valuable tool to serve as a primer for students, faculty, and professionals in their learning, teaching, and practice. This outstanding fifth edition is not only

(and Making Them Count) Exploring the art of friendship, Em Griffin discusses what attracts one person to another, how self-concept affects relationships, how people form first impressions and what ingredients make for lasting friendships.

Discussing career decision making (CDM), career guidance, a computerized system of career guidance, and the interplay among them, this book describes the way people sort themselves, or are sorted, into educational and occupational options. The options represent the content of this book, and the sorting represents the process. The sequence of decisions may extend over a lifetime, but several crucial choice-points tend to occur at predictable stages in a career. Career guidance is a professional intervention in CDM; "professional" implies that practitioners conform to a standard of ethics, knowledge, and competence beyond what may be offered by other intervenors. Guidance is partly an art, but it is also partly a science -- at least an application of science, based on a synthesis of logic and evidence derived from research. The computerized System of Interactive Guidance and Information (SIGI) is a designated

guidance "treatment," clearly defined and specified. It was developed according to an explicit model, derived from a particular rationale for guidance, using modern technology to amplify the practice of career guidance. The current version -- called SIGI PLUS TM -- is being used at more than a thousand colleges and universities, as well as secondary schools, libraries, corporations, community-based organizations, and counseling agencies. These three interdependent topics are treated in a progression: from a theory of CDM to a rationale and a model for guidance to the design and development of a system. This book weaves together theory (principles, propositions, rationales, and models), research and development. The product of that development, SIGI, helps to define theory, to exemplify it, and to test it.
