The art and science of  
glass engineering,  
specifically applied to  
automotive projects, are  
not at all commonplace.  
Although windshields,

side, and backlights seem to be obvious parts of any car, truck, or bus, designing, sourcing, and manufacturing them are unique challenges. From the business perspective, cost control makes the choice of the ideal supplier a vital decision, greatly impacting availability and production. From the technical standpoint, the

these variables using a  
no-nonsense, step-by-

book narrows the gap  
between the reader and  
a technical subject by  
using language that is  
easy to understand, a

examples, and a series  
of invaluable reference  
design tables. With a

Engineering stage  
to the design,  
installation, and  
warranty aspects. It also  
flags, along the way, the  
pitfalls and the  
important questions to

it provides the reader  
with practical ways to  
solve the not-so-obvious  
problems associated  
with the use of  
automotive glass.
