Photo Card Deck of the Elements. In late 2006 I published a photo periodic table and it's been selling well enough to encourage me to make new products. This one is a particularly neat one: A complete card deck of the elements with one big five-inch (12.7cm) square card for every element. If you like this site and all the pictures on it, you'll love this card deck.

The Photographic Card Deck of the Solar System: 126 Cards Featuring Stories, Scientific Data, and Big Beautiful Photographs of All the Planets, Moons, and Other Heavenly Bodies That Orbit Our Sun: Chown, Marcus: Amazon.sg: Books

A companion to the bestselling book The Elements: A Visual Exploration of Every Known Atom in the Universe, this beautiful photographic card deck features all 118 elements in the periodic table. One element per card appears as a full-size image on the front and fascinating information about the element on the back. The Photographic Card Deck of The Elements is the most detailed, lush, and beautiful set of cards ever produced on the subject of the periodic table. With 126, 5"X5" cards in all, it includes one card for every one of the 118 elements, plus additional cards that explain the arrangement of the periodic table, present the elements sorted by various properties, and suggest activities and uses for the cards. The front side of each card shows a full-size, photographic image of the element, while the back gives scientific information including atomic weight, density, melting and boiling point, valence, and the percent of the element found in the universe, in the Earth's crust, in oceans, and in humans. Graphics show melting/boiling points, density, electron configuration, and atomic radius. A fascinating fact about the element, as well as the date of its discovery, is also included. The cards are perfect for students but also make an excellent gift for a scientist or anyone who enjoys the beauty and diversity of the natural world.

A companion to Solar System: A Visual Exploration of the Planets, Moons, and Other Heavenly Bodies that Orbit Our Sun, this beautiful photographic card deck features 100 different items from our solar system, from planets and moons, to asteroids, solar wind, and famous astronomers – one on each card – with a full-size image on the front and fascinating information on the back. The Photographic Card Deck of the Solar System is the most beautiful and detailed set of cards ever produced on the subject. The deck includes 156 5" x 5" cards, each covering a single topic, such as an individual planet or moon, asteroids, comets, gravity, the movement of the planets, solar wind, dwarf planets, dark matter, and the possibility of life elsewhere, and more. The front side of each card features a full-size photograph while the back includes explanatory text and key scientific data illustrating the most important and interesting aspects of each topic. The cards are perfect for students, but they also make an excellent gift for scientists and adults who are fascinated by the beauty and complexity of space.

The dreamer's tarot is a photographic tarot card deck. It is combining a classical tradition of tarot with a contemporary look, design and content. It's a tool for personal development and self-discovery. This book explains the making of the card deck, as well as it gives a detailed description of every card. The dreamer's tarot is following the 600 year old tradition of tarot in a new and updated matter, combining a classical system of cards with a contemporary and modern look of analogue and digital photography, as well as new and contemporary interpretations of the meaning of every single card in the deck. It is a new interpretation of a traditional tarot card deck through digital light painting and analogue photography. The, all in all 82, images are taken in 12 countries on 4 continents over a course of ten years: between 2010 and 2020. The countries from which they are collected are: Austria, Bulgaria, Croatia, Cuba, Egypt, Germany, India, Israel, Italy, Jordan, Morocco, and Turkey.

This is a deck of 54 healing transformational cards. The images and text used are original photographs and writing by Sylvia Moss.

Created in partnership with the world-renowned Smithsonian National Air and Space Museum, this beautifully packaged, informative card deck captures, in words and stunning photographs, 100 of the museum's most important artifacts. The NASM is the world's largest, most-visited collection of historical aircraft and spacecraft, and commemorate major milestones in flight and space exploration. The 100 treasures in this deck, hand-selected by the curators, include the Spirit of St. Louis, flown by Charles Lindbergh on the first non-stop transatlantic flight; Chuck Yeager's Bell X-1, in which he broke the sound barrier; Buzz Aldrin's space suit, worn during the Apollo 11 mission, and the Space Shuttle Discovery, which flew 39 missions and spent 365 days in space. Each card includes a photograph of the object on the front and a 200-word description plus key data on the back.
