This lab book, written by Frank Pugh and Wes Ponick, provides students and instructors with easy to follow laboratory experiments. The experiments range from an introduction to laboratory equipment to experiments dealing with filter applications. All experiments have been student tested to ensure their effectiveness. The lab book is organized to correlate with topics

covered in the text chapter
by chapter. All experiments
have a MultiSim activity
that is to be done prior to
the actual physical lab
activity. MultiSim files
(version 8) are included on
a bound-in CD-ROM. This
prepares students to work
with circuit simulation
software, and also to do
"pre-lab" preparation before
doing a physical lab
exercise. MultiSim coverage
also reflects the widespread
use of circuit simulation
software in today's
electronic industries.
