The definitive guide to registration methodology for smaller

Online Library Registration Methods For The Small Museum American Association

institutions and beginning or part-time registrars. This is a completely new and updated version of the original classic; included is a discussion of computer technology and its uses and implications for the small museum. Also provided: sample manuals and forms for immediate use.

Registration Methods for the Small Museum covers all aspects of the registration process and provides practical solutions for the small museum professional. The fifth edition updates the handbook to fit the registration systems in today's small museums and provides additional forms that weren't in previous additions of the book.

Since 1978 Daniel B. Reibel's Registration Methods for the Small Museum has been the definitive guide to registration methodology. Long considered an indispensable reference tool by historians and archivists, this new third edition covers topics of increasing significance, such as the new accessibility of computers and the ways in which small museums can actively employ this technology with new registration software. Reibel's considerations of technology and its implications for the small museum excellently supplement the content which originally made this text a classic - an authoritative and comprehensive discussion of effective registration techniques for the small museum presented in a concise, readable manner with sample

registrar's manuals forms for immediate use.

The two-volume set LNCS 3749 and LNCS 3750 constitutes the refereed proceedings of the 8th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2005, held in Palm Springs, CA, USA, in October 2005. Based on rigorous peer reviews the program committee selected 237 carefully revised full papers from 632 submissions for presentation in two volumes. The first volume includes all the contributions related to image analysis and validation, vascular image segmentation, image registration, diffusion tensor image analysis, image segmentation and analysis, clinical applications - validation, imaging systems - visualization, computer assisted diagnosis, cellular and molecular image analysis, physically-based modeling, robotics and intervention, medical image computing for clinical applications, and biological imaging - simulation and modeling. The second volume collects the papers related to robotics, image-guided surgery and interventions, image registration, medical image computing, structural and functional brain analysis, model-based image analysis, image-guided intervention: simulation, modeling and display, and image segmentation and analysis.

An interdisciplinary analysis of human growth in past populations, first published in 1999.

A successor to Museum Registration Methods after the revision of its third volume was abandoned as impractical. Reports the most recent research and practice for improving the care, safety, and documentation of museum collections. Covers documentation, collections management, processes, administrative functions, risk management, and ethical and legal issues. Includes a glossary without pronunciation.
