As with Hotel Babylon, Restaurant Babylon is told in a chatty, conversational manner recounting tales from over a period of time but condensed into a 24 hour period for the purposes of this book. It's a clever way of telling these tales and kept me turning the pages.

What makes a restaurant hot? Whose name do you need to drop to get a table? Why is one place booked solid for the next nine months while somewhere equally delicious is as empty and inhospitable as the Gobi desert? Welcome to the restaurant business, where the hours are punishing, the conditions are brutal and the Chef's Special has been languishing at the back of the fridge for the past three days. This is an industry plagued with obsessives. Why else do some chefs drive themselves crazy in pursuit of elusive Michelin stars, when in reality all they're doing is 'making someone else's tea'? Nothing is left to chance: the lighting, the temperature or even the cut of the salmon fillet. There's even a spot of psychology

behind the menu. What do they want you to order? What makes them the most money? And why should you really hold back on those side dishes? In *Restaurant Babylon*, Imogen Edwards-Jones and her anonymous industry insider lift the lid on all the tricks of the food trade and what really makes this £90 billion a year industry tick. So please do sit down, pour yourself some heavily marked-up wine and make yourself comfortable (although we'll need that table back by 8.30 sharp).

As the birthplace of the Black Panthers and a nationwide tax revolt, California embodied a crucial motif of the postwar United States: the rise of suburbs and the decline of cities, a process in which black and white histories inextricably joined. *American Babylon* tells this story through Oakland and its nearby suburbs, tracing both the history of civil rights and black power politics as well as the history of suburbanization and home-owner politics. Robert Self shows that racial inequities in both New Deal and Great Society liberalism precipitated local struggles over land, jobs, taxes, and race within postwar metropolitan development. Black power and the tax revolt evolved together, in tension. *American Babylon* demonstrates that the history of civil rights and black liberation politics in California did not follow a southern model, but represented a long-term struggle for economic rights that began during the World War II years and continued through the rise of the Black Panthers in the late 1960s. This struggle yielded a wide-ranging and profound critique of postwar metropolitan development and its foundation of class and racial segregation. Self traces the roots of the 1978 tax revolt to the 1940s, when home owners, real estate brokers, and the federal government used racial segregation and industrial property taxes to forge a middle-class lifestyle centered on property ownership. Using the East Bay as a starting point, Robert Self gives us a richly detailed, engaging narrative that uniquely integrates the most important racial liberation struggles and class politics of postwar America.

This cult classic from the author of *Trout Fishing in America* "reads like a spaghetti Western crossed with *Frankenstein*, viewed through an opium haze" (*The Sunday Times*). The celebrated poet, novelist, and guru of the 1960s San Francisco literary scene, Richard Brautigan brings his highly original Gonzo style to this surreal parody Western. The time is 1902, the setting eastern Oregon. In the ice caves underneath Professor Hawkline's house, a deadly monster lurks. It's already turned the professor into an elephant foot umbrella stand, and now his two beautiful daughters have hired a pair of gunslingers to put a stop to the mayhem. But Hawkline Manor is full of curiosities and secrets, like the professor's underground laboratory where his work on *The Chemicals* remains unfinished. And as the gunslingers pursue their peculiar quarry, they encounter monstrous mischief, amorous advances, and evil that is all too human. "Bursting with colour, humour and imagery, Brautigan's virtuoso prose is rooted in his rural past." —*The Guardian*

Theresa Santmann found herself in a world far from the farm of her youth in Ellenburg, New York. Despite the fact that she had a husband with ALS, two very young children, and no way to care for her family and pay the mounting bills, she rose to an unusual challenge. She found a four-apartment rental property in Babylon, New York and turned it into an adult home, the Little Flower Residence, where her husband became her first patient. She returned to school for nursing and began a new life that changed the lives of everyone around her. Theresa's resourcefulness led her to becoming a registered nurse. She was the first woman in

New York State to obtain an FHA-backed loan to build a 160-bed nursing home, with only a woman's name on the application. She operated one of the most successful nursing homes on Long Island, invented and patented a unique walker, became an airplane pilot, and so much more. One of her more daring escapades was overcoming a navigational challenge with her disabled husband and two young children on board their thirty-seven-foot boat, Wicky One, from her home in Babylon to Canada. She plotted the course through the waterways; Fire Island inlet, west in the Atlantic Ocean, up the Hudson River, past West Point, and beyond. Soon there was another challenge, the locks that she had never navigated nor witnessed. She managed till finally there it was, Lake Champlain.

Murder, extortion, kidnapping, arson, embezzlement and his inner demons are just some of the horrors Adam Strong must deal with during what will be two of the worst weeks of his life.

Sharing its name with a notorious ancient city, Babylon village has been the home harbor of Long Island baymen, a post-World War II suburban boomtown, and the birthplace of the nation's first professional black baseball team. The modern village is well known for its picturesque Argyle Park and flourishing downtown, but it was once revered as a vacation resort destination for those near and far. The community has evolved from decades of residents, visitors, and experiences that have contributed to and created the history of Babylon village, one of the oldest established communities on the South Shore of Long Island.

Boys of Babylon By: Craig Rory Draheim There is a small tourist trap in the Northern Midwest. A trap may be exactly what it is. People go for the fudge, but is it good enough to risk their life for? In Midwestern fashion, the dark secrets are covered up and disguised as quaint diners, candy shops, and beautiful vacation homes. During the summer of 2004, like every year, a new group of naïve tourists make their way into town. Six boys take advantage of these unsuspecting vacationers as they meet their watery grave on a popular recreational river. This rite of passage turns on the town when tragedy strikes one of their own. The children's parents are forced to come face to face with the sadistic games of their once "sweet angels." But how does one handle a child without coming to terms with such a twisted reality in a place where no one wants to confront their demons?

Since America's founding, the nation's capital has experienced more than its share of scandals; thankfully, Washington Babylon explores some of the dirtiest secrets that have occurred throughout US history. Some are from the earliest days of America's founding and include the most famous people in history, like George Washington. Others are still fresh in our minds, as the dust has not even settled. In between, US history is littered with scandals from nearly all walks of life that were the most talked-about stories at the time. Many past scandals remain infamous, such as Watergate, Chappaquiddick, and Abscam. Other scandals that were once the biggest stories of the day have faded into obscurity. Washington Babylon reveals new details in some scandals that were not known when the story first broke, offering a whole new perspective for discussion. This is the most comprehensive collection of American scandals that will educate, entertain, shock, and perhaps, even titillate the reader.

It is 1989. Across Central Europe, socialism is crumbling, and robber capitalism is being born. Rivers of Babylon tells this story of a Central Europe, where criminals, intellectuals and secret policemen have infiltrated a new democracy, through the eyes of Racz, sociopathic gangster and idiot of genius. Slovak readers acknowledge Peter Pist'aneek as their most flamboyant and fearless writer, stripping the nation of its myths and false self-esteem.
