Build Highly Usable, High-Performance Business Applications with Silverlight 5 Microsoft Silverlight MVP and Wintellect Consultant Jeremy Likness gives you all the hands-on guidance and proven patterns and practices you need to build scalable, maintainable, and highly professional applications for multiple platforms and browsers. In this first complete guide to designing Silverlight applications for commercial use, Likness focuses on the advanced Silverlight features most directly related to solving real-world business problems and demonstrates how these features fit together in production-quality applications. Written from the ground up, this book covers every key area of enterprise Silverlight development. For each, Likness introduces the opportunities and capabilities Silverlight provides, offers relevant case studies from actual projects, presents complete C# code samples, and explains them in detail. Every chapter concludes with a summary highlighting the specific information and techniques most important for developers to consider. Coverage includes

- Discovering why Silverlight is superior to HTML5/JavaScript for most line-of-business applications
- Leveraging Silverlight 5 ' s powerful enhancements to performance, text, printing, usability, security, and programmability
- Effectively applying Silverlight ' s application cycle in enterprise applications
- Using XAML to drive Silverlight ' s visual interface
- Quickly transforming raw data into visually appealing information
- Using Silverlight ' s innovative Visual State Manager and data binding to separate design, UI/UX experience, and business logic
- Simplifying development with the MVVM pattern
- Using MEF to integrate modular code into highly extensible, maintainable, and testable Silverlight applications
- Improving and automating testing with Silverlight Unit Testing Framework and third-party add-ons
- Mastering each leading approach to navigation and implementing the best one for your application
- Implementing the service layer, persistence, and state management
- Building advanced “ out-of-browser ” applications
- Integrating sophisticated line-of-business features into your solutions
- Optimizing the performance of your Silverlight applications

This book will be invaluable for all experienced client developers who use Microsoft ' s technology stack and want to leverage Silverlight ' s immense power; and for every Silverlight developer seeking to improve existing line-of-business applications with the new Silverlight 5.

This book constitutes the thoroughly refereed joint post-workshop proceedings of three international workshops held in conjunction with the 10th Asia-Pacific Web Conference, APWeb 2008, in Shenyang, China, in April 2008 (see LNCS 4976). The 15 revised full papers presented together with 4 invited papers and 4 keynote lectures were carefully reviewed and selected from numerous submissions. Topics addressed by the workshops are business intelligence and data mining (BIDM 2008), health data management (IWHDM 2008), and data engineering and Web technology research (DeWeb 2008). The papers focus on issues such as Web searching, Web services, database, data mining, bioinformatics, and business intelligence.

Leading the way in this field, the Encyclopedia of Quantitative Risk Analysis and Assessment is the first publication to offer a modern, comprehensive and in-depth resource to the huge variety of disciplines involved. A truly international work, its coverage ranges across risk issues pertinent to life scientists, engineers, policy makers, healthcare professionals, the finance industry, the military and practising statisticians. Drawing on the expertise of world-renowned authors and editors in this field this title provides up-to-date material on drug safety, investment theory, public policy applications, transportation safety, public perception of risk, epidemiological risk, national defence and security, critical

infrastructure, and program management. This major publication is easily accessible for all those involved in the field of risk assessment and analysis. For ease-of-use it is available in print and online.

This book constitutes the thoroughly refereed post-conference proceedings of the Third International Joint Conference on Biomedical Engineering Systems and Technologies, BIOSTEC 2010, held in Valencia, Spain, in January 2010. The 30 revised full papers presented together with 1 invited lecture were carefully reviewed and selected from a total of 410 submissions in two rounds of reviewing and improvement. The papers cover a wide range of topics and are organized in four general topical sections on healthinf, biodevices, biosignals, and bioinformatics.
