****THE MULTI-MILLION COPY BESTSELLER**** 'Interesting and provocative... It gives you a sense of how briefly we've been on this Earth' Barack Obama What makes us brilliant? What makes us deadly? What makes us Sapiens? Yuval Noah Harari challenges everything we know about being human. Earth is 4.5 billion years old. In just a fraction of that time, one species among countless others has conquered it: us. In this bold and provocative book, Yuval Noah Harari explores who we are, how we got here and where we're going. The perfect gift for curious readers this Christmas. _____ PRAISE FOR SAPIENS: 'Jaw-dropping from the first word to the last... It may be the best book I've ever read' Chris Evans 'Sweeps the cobwebs out of your brain... Radiates power and clarity' Sunday Times 'It altered how I view our species and our world' Guardian 'Startling... It changes the way you look at the world' Simon Mayo 'I would recommend Sapiens to anyone who's interested in the history and future of our species' Bill Gates ****ONE OF THE GUARDIAN'S 100 BEST BOOKS OF THE 21st CENTURY****

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past

developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

NATIONAL BESTSELLER NEW YORK TIMES BESTSELLER Destined to become a modern classic in the vein of Guns, Germs, and Steel, Sapiens is a lively, groundbreaking history of humankind told from a unique perspective. 100,000 years ago, at least six species of human inhabited the earth. Today there is just one. Us. Homo Sapiens. How did our species succeed in the battle for dominance? Why did our foraging ancestors come together to create cities and kingdoms? How did we come to believe in gods, nations, and human rights; to trust money, books, and laws; and to be enslaved by bureaucracy, timetables, and consumerism? And what will our world be like in the millennia to come? In Sapiens, Dr. Yuval Noah Harari spans the whole of human history, from the very first humans to walk the earth to the radical -- and sometimes devastating -- breakthroughs of the Cognitive, Agricultural, and Scientific Revolutions. Drawing on insights from biology, anthropology, palaeontology, and economics, he explores how the currents of history have shaped our human societies, the animals and plants around us, and even our personalities. Have we become happier as history has unfolded? Can we ever free our behaviour from the heritage of our ancestors? And what, if anything, can we do to influence the course of the centuries to come? Bold, wide-ranging and provocative, Sapiens challenges everything we thought we knew about being human: our thoughts, our actions, our power...and our future.

what, if anything, can we do to influence the course of the centuries to come? Bold, wide-ranging and provocative, Sapiens challenges everything we thought we knew about being human: our thoughts, our actions, our power ... and our future. 'Here is a simple reason why Sapiens has risen explosively to the ranks of an international bestseller. It tackles the biggest questions of history and of the modern world, and it is written in unforgettably vivid language. You will love it!' - Jared Diamond

****THE MILLION COPY BESTSELLER**** Sapiens showed us where we came from. In uncertain times, Homo Deus shows us where we're going. 'Homo Deus will shock you. It will entertain you. It will make you think in ways you had not thought before' Daniel Kahneman, bestselling author of Thinking, Fast and Slow Yuval Noah Harari envisions a near future in which we face a new set of challenges. Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century and beyond - from overcoming death to creating artificial life. It asks the fundamental questions: how can we protect this fragile world from our own destructive power? And what does our future hold?

Featuring 256 pages of gorgeous full-colour illustrations and wrapped in a beautiful package - this is the perfect Christmas gift for the curious beings in your life. One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one-homo sapiens. What happened to the others? And what may happen to us? In this first volume of the adaptation of his ground-breaking book, renowned historian Yuval Harari tells the story of humankind's creation and evolution, exploring the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human". From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens challenges us to reconsider accepted beliefs, connect past developments with contemporary concerns, and view specific events within the context of larger ideas. Featuring easy-to-understand text covering the first part of the original edition, this adaptation of the mind-expanding book furthers the ongoing conversation as it introduces Harari's ideas to a wider new readership. '[A] wonderful graphic novel... Smart, funny and dipped deep in the reality of what we as a species are...' Big Issue *Books of the Year*

University Press returns with another short and captivating book - a brief history of our human species: Homo sapiens. All the humans who ever lived are extinct - except for Homo sapiens. We are, in Latin, the "wise humans." We are the sole survivors of a long and deadly battle against the forces of nature and time. The first humans - hominids - diverged from the other primates and began to walk upright on two legs some 3 million years ago. The first "modern" humans - Homo sapiens - diverged from

the other hominids some 250,000 years ago. Since then, modern humans and our big brains migrated out of Africa, developed the capacity for language, domesticated animals, became farmers, learned to write, got religious, built cities, invented money, expanded empires, harnessed the scientific method, tried enlightenment, challenged authority, created machines, conquered the air, weaponized the atom, eliminated disease, walked on the moon, did the internet, made artificial intelligence, fed seven billion people, and speculated about the future of our species. This short book provides a captivating account of the noble, savage, sacred, mundane, heroic and heart-warming events that connect us with our earliest ancestors - an account that you can read in about an hour.

Discover the second volume of an epic, beautifully illustrated graphic history of humankind, based on Yuval Noah Harari's multi-million copy bestselling phenomenon. The perfect gift this Christmas. When nomadic Homo sapiens settled to live in one place, they started working harder and harder. But why didn't they get a better life in return? In *The Pillars of Civilization*, Yuval Noah Harari and his companions including Prof. Saraswati and Dr. Fiction travel the length and breadth of human history to investigate how the Agricultural Revolution changed society forever. Discover how wheat took over the world, how war, famine, disease and inequality became a part of the human condition, and why we might only have ourselves to blame. The origins of modern farming are told through Elizabethan tragedy, the changing fortunes of domesticated plants and animals are tracked in the columns of the *Daily Business News*, and the history of inequality is revealed in a superhero detective story. A radical, witty and colourful retelling of the story of humankind, adapted from Yuval Noah Harari's *Sapiens: A Brief History of Humankind*, Volume 2 can be read as a standalone or as a follow-up to Volume 1, *The Birth of Humankind*. Praise for Yuval Noah Harari's *Sapiens*: 'I would recommend *Sapiens* to anyone who's interested in the history and future of our species.' Bill Gates 'Interesting and provocative... It gives you a sense of how briefly we've been on this Earth' Barack Obama 'Jaw-dropping from the first word to the last... It may be the best book I've ever read' Chris Evans 'Contains a remarkable piece of information on almost every page and reminds us that we should be grateful to be human.' Matt Haig 'Sweeps the cobwebs out of your brain... Radiates power and clarity, making the world strange and new' Sunday Times 'Provocative and fascinating and opinionated...it makes the familiar seem unfamiliar. It altered how I view our species and our world.' Guardian
