IRVINE, Calif., Dec. 16, 2020 /PRNewswire/ -- MIND Research Institute announced the promotion of Twana Young, M.Ed., to Vice President of Curriculum and Instruction. Young brings over 20 years of ...

As educators across the U.S. and around the world know, lesson study gives teachers powerful classroom-based feedback that helps them evaluate their students' thinking and understanding. They become stronger instructional decision makers skilled at improving their own effectiveness. That translates into lasting benefits for teachers, students, and the entire school community. Through lesson study teachers develop a community for ongoing learning about mathematics and the craft of teaching. Through multiple cycles of lesson research they make real progress on long-term goals. Now, there is a ready resource to bring the benefits of lesson study to teachers in your school. Jane Gorman, June Mark, and Johannah Nikula have been leaders in lesson study for over a decade. They've helped novice and experienced lesson study teams enrich their professional learning. In Lesson Study in Practice: A Mathematics Staff Development Course, they share their wealth of experience and best practices. Their course offers a structured introduction to lesson study in a learn-by-doing format. Participants develop the mathematical knowledge for teaching that they need while they work through a full lesson study cycle. The course includes10 ready-to-go sessions complete with activities, professional readings, handouts, facilitator notes, and slides, DVD with video of the case study team in the classroom and in meetings, and comprehensive advice on organization, logistics, and the facilitation process. Both novice teams and experienced teams who want to enhance their practice are sure to find great value in the course and their instruction will be enriched. Give teachers and leaders a proven model for lasting learning and real results in improved practice.

Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade K provides an overview of all of the Kindergarten modules, including Numbers to 10; Two-Dimensional and Three-Dimensional Shapes; Comparison of Length, Weight, Capacity, and Numbers to 10; Number Pairs, Addition and Subtraction to 10; Numbers 10–20 and Counting to 10; and Analyzing Comparing and Composing Shapes.
