Steve Jobs wrote and delivered the commencement speech "Stay Hungry. Stay Foolish." to the graduates of Stanford University on June 12, 2005. The style and content are very different from his Apple product launch presentations, but no less worthy of study. Noteworthy elements of this wonderful speech include:

In 2005 Steve Jobs gave his first and only 'commencement address' – a lecture given to the graduating class at Stanford University in the US, an audience of 23,000 students. This lecture was to be the most famous such address and resulted in 26 million viewers once it hit the web. It was an opportunity for Jobs to pause and reflect, to provide a personal and professional summation of his remarkable life. Steve Jobs Life By Design, is based on this lecture, with the author, George Beahm connecting the dots and providing the examples, context and perspective from Jobs' life to expand on each lesson. George Beahm is a New York Times bestselling author. Beahm has also published more than thirty books on popular culture subjects, including Michael Jordan, J.K. Rowling, Philip Pullman, C.S. Lewis, J.R.R. Tolkien, Indiana Jones, Anne Rice, Patricia Cornwell, the Big Bang Theory television show, Caribbean Pirates, censorship, and Stephen King (several books). Among his most recent books is I, Steve: Steve Jobs in His Own Words which debuted on the New York Times bestseller list at #3, and has sold more than two dozen foreign language editions. Its worldwide success led to a line of business-related quote books on media mogul Rupert Murdoch, Facebook's Mark Zuckerberg, and the Google co-founders, Sergey Brin and Larry Page.

This fascinating biography tells the story of Steve Jobs, genius pioneer of the digital age, and his role in creating and building Apple, one of the world's most powerful, profitable, and innovative companies. In vivid, detailed chapters, the author describes the evolution of Apple from a start-up in the Jobs family garage to a company that has changed the way we all live, work, communicate, and are entertained today. Readers will enjoy following the twists and turns of one man's dramatic life story while also learning how computer technology and digital devices have evolved over the past fifty years. The book is a must-read for all people interested in technology, business, art, or design. It will also appeal to anyone curious about how today's digital world developed, explained through the story of one of the world's iconoclastic leaders.

Steve Jobs weathered the deepest betrayals, endured relentless public humiliations and was pushed to the brink of bankruptcy. When he returned to the company he had co-founded, he was welcomed home by an Apple that was just as battered and bruised as he was, and on the brink of the abyss. How these two entities, Steve the man, and Apple the company, healed each other, is well worth learning. Ninety days from bankruptcy, Apple welcomed home its founder in 1996. In less than a decade, Steve accomplished the impossible - Apple was now a trillion dollar juggernaut. Their domain included Music, Books, SmartPhones, Tablets, Laptops and more. Within these pages are the often overlooked, misunderstood or misrepresented lessons that made it all possible and you won't find them anywhere else. Levy is the former Pixar chief financial officer. When Levy arrived at Pixar in 1995 at the behest of CEO Steve Jobs, the animation company was struggling. Jobs purchased the company in 1986 to be a graphics hardware business, but it had not succeeded in this area. In 1991, he had to sell off Pixar's hardware company. What was left was a computer animation business without a strategic vision. It was locked into a restrictive three-picture deal with Disney that threatened to crush any of Pixar's ambitions to be a successful company in its own right. The deal effectively gave Disney full ownership of Pixar without having to buy the computer animation company. Under the terms...
