Zygmunt Bauman: the art of life (CHAPTER 2) Presentation in Class: The presentation in class can be with or without a PowerPoint. It is a draft of your research paper shared. The goal is to have your classmates comment and to inspire you to take your ideas to another level. To add the personal if missing as well as augment the conceptual.

In our individualized society we are all artists of life – whether we know it or not, will it or not and like it or not, by decree of society if not by our own choice. In this society we are all expected, rightly or wrongly, to give our lives purpose and form by using our own skills and resources, even if we lack the tools and materials with which artists' studios need to be equipped for the artist's work to be conceived and executed. And we are praised or censured for the results – for what we have managed or failed to accomplish and for what we have achieved and lost. In our liquid modern society we are also taught to believe that the purpose of the art of life should be and can be happiness – though it's not clear what happiness is, the images of a happy state keep changing and the state of happiness remains most of the time something yet-to-be-reached. This new book by Zygmunt Bauman – one of the most original and influential social thinkers writing today – is not a book of designs for the art of life nor a 'how to' book: the construction of a design for life and the way it is pursued is and cannot but be an individual responsibility and individual accomplishment. It is instead a brilliant account of conditions under which our designs-for-life are chosen, of the constraints that might be imposed on their choice and of the interplay of design, accident and character that shape their implementation. Last but not least, it is a study of the ways in which our society – the liquid modern, individualized society of consumers – influences (but does not determine) the way we construct and narrate our life trajectories.

With the advent of liquid modernity, the society of producers is transformed into a society of consumers. In this new consumer society, individuals become simultaneously the promoters of commodities and the commodities they promote. They are, at one and the same time, the merchandise and the marketer, the goods and the travelling salespeople. They all inhabit the same social space that is customarily described by the term the market. The test they need to pass in order to acquire the social prizes they covet requires them to recast themselves as products capable of drawing attention to themselves. This subtle and pervasive transformation of consumers into commodities is the most important feature of the society of consumers. It is the hidden truth, the deepest and most closely guarded secret, of the consumer society in which we now live. In this new book Zygmunt Bauman examines the impact of consumerist attitudes and patterns of conduct on various apparently unconnected aspects of social life politics and democracy, social divisions and stratification, communities and partnerships, identity building, the production and use of knowledge, and value preferences. The invasion and colonization of the web of human relations by the worldviews and behavioural patterns inspired and shaped by commodity markets, and the sources of resentment, dissent and occasional resistance to the occupying forces, are the central themes of this brilliant new book by one of the worlds most original and insightful social thinkers.

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

"Previously unpublished writings on culture and art by one of the most influential social thinkers of our time"--

A new book by one of the most original and brilliant social thinkers of our time. Extends and develops some of the key themes in other Bauman titles, namely what it is to live in a time of 'liquid modernity', identity, culture and consumerism.

The production of 'human waste' – or more precisely, wasted lives, the 'superfluous' populations of migrants, refugees and other outcasts – is an inevitable outcome of modernization. It is an unavoidable side-effect of economic progress and the quest for order which is characteristic of modernity. As long as large parts of the world remained wholly or partly unaffected by modernization, they were treated by modernizing societies as lands that were able to absorb the excess of population in the 'developed countries'. Global solutions were sought, and temporarily found, to locally produced overpopulation problems. But as modernization has reached the furthest lands of the planet, 'redundant population' is produced everywhere and all localities have to bear the consequences of modernity's global triumph. They are now confronted with the need to seek – in vain, it seems – local solutions to globally produced problems. The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival, but the planet is fast running out of places to put them. Hence the new anxieties about 'immigrants' and 'asylum seekers' and the growing role played by diffuse 'security fears' on the contemporary political agenda. With characteristic brilliance, this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with 'human waste' provides a key for understanding some otherwise baffling features of our shared life, from the strategies of global domination to the most intimate aspects of human relationships.

Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body – tattoos, cosmetic surgery, hipsters – aggression, bullying, the Internet, online dating, gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

In its original formulation, 'culture' was intended to be an agent for change, a mission undertaken with the aim of educating 'the people' by bringing the best of human thought and creativity to them. But in our contemporary liquid-modern world, culture has lost its missionary role and has become a means of seduction: it seeks no longer to enlighten the people but to seduce them. The function of culture today is not to satisfy existing needs but to create new ones, while simultaneously ensuring that existing needs remain permanently unfulfilled. Culture today likens itself to a giant department store where the shelves are overflowing with desirable goods that are changed on a daily basis - just long enough to stimulate desires whose gratification is perpetually postponed. In this new book, Zygmunt Bauman - one of the most brilliant and influential social thinkers of our time - retraces the peregrinations of the concept of culture and examines its fate in a world marked by the powerful new forces of globalization, migration and the intermingling of populations. He argues that Europe has a particularly important role to play in revitalizing our understanding of culture, precisely because Europe, with its great diversity of peoples, languages and histories, is the space where the Other is always one's neighbour and where each is constantly called upon to learn from everyone else.

In *The Twilight of the Social*, Henry A. Giroux looks at the decline of social spaces which enable grievances to be dealt with and considers new ways in which citizens can create social spaces today. After decades of neoliberalism, today's young people lack a voice and are saddled with economic, political, and social conditions that have rendered them marginalised and ultimately disposable. Giroux covers a broad range of topics - from youth and the promise of new media technologies, the economic Darwinism of globalisation, and the need for a renewed democratic culture. *The Twilight of the Social* is a compelling account of the erosion in recent decades of the very idea of 'the social' in America and other societies.

The passage from 'solid' to 'liquid' modernity has created a new and unprecedented setting for individual life pursuits, confronting individuals with a series of challenges never before encountered. Social forms and institutions no longer have enough time to solidify and cannot serve as frames of reference for human actions and long-term life plans, so individuals have to find other ways to organise their lives. They have to splice together an unending series of short-term projects and episodes that don't add up to the kind of sequence to which concepts like 'career' and 'progress' could meaningfully be applied. Such fragmented lives require individuals to be flexible and adaptable – to be constantly ready and willing to change tactics at short notice, to abandon commitments and loyalties without regret and to pursue opportunities according to their current availability. In liquid modernity the individual must act, plan actions and calculate the likely gains and losses of acting (or failing to act) under conditions of endemic uncertainty. Zygmunt Bauman's brilliant writings on liquid modernity have altered the way we think about the contemporary world. In this short book he explores the sources of the endemic uncertainty which shapes our lives today and, in so doing, he provides the reader with a brief and accessible introduction to his highly original account, developed at greater length in his previous books, of life in our liquid modern times.
