Luis Robles was published in the National Tactical Officer Association ' s Journal, The Tactical Edge for his article entitled The Americans with Disabilities Act and Law Enforcement ' s Response to the Mentally Ill, The Tactical Edge, pp. 66-70 (Spring 2013)

As mankind finds ever more impious ways to kill and maim, some look to non-lethal weapons as a fix. Brian Rappert discusses the technologies involved and the ethics of, for example blinding someone with a laser, leaving them blind forever, versus killing them outright.

This book is designed to provide law enforcement personnel with response guidelines and evidence gathering techniques that may be utilized when responding to an incident involving the use or threatened use of a weapon of mass destruction (WMD). The first part of the book addresses the actions to be taken by the first law enforcement personnel arriving at the scene of a WMD incident. The text examines the planning process in great detail, and the incident management process is also extensively reviewed. Tactical operations that may be necessary to arrest individuals or prevent a WMD incident are also discussed. The second part of the book is designed for the hazardous material trained investigator. The required training, equipment, and investigative procedures are clearly defined in this section, and detailed step-by-step instructions are provided for the collection of chemical, biological, and radiological evidence. In addition, investigative techniques are provided that will assist the criminal investigator in identifying and entering a facility suspected of manufacturing a weapon of mass destruction. Remote sampling techniques are provided to assist in gathering the probable cause for a search warrant. Also helpful to readers are the many illustrations and a glossary. It will be clear to the reader that this unique book represents the epitome of authoritativeness and comprehensiveness in the field of WMD response and investigation.

As mankind finds ever more impious ways to kill and maim, some look to non-lethal weapons as a fix. Brian Rappert discusses the technologies involved and the ethics of, for example blinding someone with a laser, leaving them blind forever, versus killing them outright.

These essays address issues like police regionalization, the role of police unions, the use of police tactical units, and the role of women in policing.

Prehospital Care Pearls and Pitfalls, is a unique, stimulating, and easy-to-read way, provide practical information applicable to the prehospital setting and help the prehospital emergency care provider be prepared to manage the myriad of emergency and non-emergency situations that he or she will be called upon to assist.

Quickly and decisively manage any medical emergency you encounter in the great outdoors with Wilderness Medicine! World-renowned authority and author, Dr. Paul Auerbach, and a team of experts offer proven, practical, visual guidance for effectively diagnosing and treating the full range of emergencies and health problems encountered in situations where time and resources are scarce. Every day, more and more people are venturing into the wilderness and extreme environments, or are victims of horrific natural disasters...and many are unprepared for the dangers and aftermath that come with these episodes. Whether these victims are stranded on mountaintops, lost in the desert, injured on a remote bike path, or ill far out at sea, this indispensable resource—now with online access at [www.expertconsult.com](#) for greater accessibility and portability-- equips rescuers and health care professionals to effectively address and prevent injury and illness in the wilderness! This textbook is widely referred to as "The Bible of Wilderness Medicine." Be able to practice emergency medicine outside of the traditional hospital/clinical setting whether you are in remote environments, underdeveloped but highly populated areas, or disaster areas, are part of search and rescue operations, or dealing with casualties from episodes of extreme sports and active lifestyle activities. Face any medical challenge in the wilderness with expert guidance: Dr. Auerbach is a noted author and the world's leading authority on wilderness medicine. He is a founder and Past President of the Wilderness Medical Society, consultant to the Divers Alert Network and many other agencies and organizations, and a member of the National Medical Committee for the National Ski Patrol System. Handle everything from frostbite to infection by marine microbes, not to mention other diverse injuries, bites, stings, poisonous plant exposures, animal attacks, and natural disasters. Grasp the essential aspects of search and rescue. Respond quickly and effectively by improvising with available materials. Improve your competency and readiness with the latest guidance on volcanic eruptions, extreme sports, splints and slings, wilderness cardiology, living off the land, aerospace medicine, mental health in the wilderness, tactical combat casualty care, and much more. Meet the needs and special considerations of specific patient populations such as children, women, elders, persons with chronic medical conditions, and the disabled. Make smart decisions about gear, navigation, nutrition, and survival. Be prepared for everything with expanded coverage on topics such as high altitude, cold water immersion, and poisonous and venomous plants and animals. Get the skills you need now with new information on global humanitarian relief and expedition medicine, plus expanded coverage of injury prevention and environmental preservation. Get guidance on the go with fully searchable online text, plus bonus images, tables and video clips - all available on ExpertConsult.com.

Editor-in-Chief, Dr. Gregory Clottone, and Associate Editors, Dr. Philip D. Anderson, Dr. Erik Auf Der Heide, Dr. Robert G. Darling, Dr. Irving Jacoby, Dr. Eric Nojji, and Dr. Selim Suner, recognized worldwide as authorities in the field, bring you this brand-new reference, which offers comprehensive yet succinct guidance on the preparation, assessment, and management of a full range of disasters, both natural and man-made (including terrorist attacks and the threat of biological warfare). More than 200 contributors carefully outline the basics of disaster management and provide guidance on more than 100 specific disaster situations. Part 1 offers an A to Z source for information on every aspect of disaster medicine and management. Part 2 features an exhaustive compilation of every conceivable disaster event, organized to facilitate fast reference in a real-time setting. The second part of the book also serves as a quick consult on disaster medicine. Presents a full range of coverage from the basics of disaster medicine to more advanced concepts, such as tactical EMS, hazard vulnerability analysis, impact of disaster on children, and more. Discusses identification of risks, planning of organization and equipment, and education and training. Includes individual Concepts and Events sections that provide information on the general approach to disaster medicine and practical information on specific disasters. Offers comprehensive coverage of natural disasters, accidental disasters, transportation disasters, and intentional events. Includes an exhaustive list of chapters on the conceivable chemical and biologic weapons known today. Features a practical chapter organization throughout that covers description of event, pre-incident considerations, post-incident considerations, medical treatment of casualties, unique considerations, pitfalls, case presentations, and suggested reading. Discusses the management of future events, or possible scenarios, for which there is no precedent.

This second Small Wars Journal-El Centro anthology signifies the important debate that this new forum, focusing on the crime wars and criminal insurgencies taking place in Mexico and other regions of the Americas, is helping to generate in U.S. defense and homeland security circles. The debate comes at a time when neither of the two major U.S. presidential candidates were willingly to candidly discuss this issue and at the end of the recent Felipe Calderon administration which saw over 80,000 dead, 20,000 missing, and 200,000 internal refugees stemming from gang and cartel violence during its tenure in Mexico. Dave Dilegge SWJ Editor-in-Chief

Drawn from case examples of incidents from around the world, Targeted Violence: A Statistical and Tactical Analysis of Assassinations, Contract Killings, and Kidnappings is the most complete resource of information on the attack methodologies, tactics used, and groups responsible for targeted killings and kidnappings. The author, a former SWAT and JTTF team member—whose experience includes providing protection to diplomats, high-ranking military personnel, prosecutors, and organized crime informants—presents a wealth of global statistics on assassinations, contract killings, and kidnappings that have occurred from 1950 to the present. Leaving no stone unturned, the book breaks down the various incidents of targeted violence by region, country, month, day of the week, and time of day. It reports on likely locations for each type of attack, success rates, who is likely to initiate the attacks, and who they are most likely to target. The book ' s easy-to-follow format allows readers, experienced or not in personal protective work, to determine the types of attacks known to have occurred in any region. This complete reference includes 35 case studies that examine attacks on motorcades and pedestrians dating back to 1973—highlighting the lessons to be learned from each example. It analyzes the modus operandi of individual assailants and groups in order to determine commonalities between targeted victims and why certain groups tend to target a specific type of individual. The text concludes with a chapter on victimology. Just like anyone, assassins and hit men fall into routines and can become creatures of habit. By studying and understanding the collection of historical information contained in these pages, security, military, and law enforcement professionals responsible for providing protection will be better prepared to identify potential threats and develop the tactics needed to thwart such attacks.
